Erin (AL052025), 14 Aug 2025, 12Z cycle / 15Z advisory: Atlantic rapid intensification (to 140 kt)

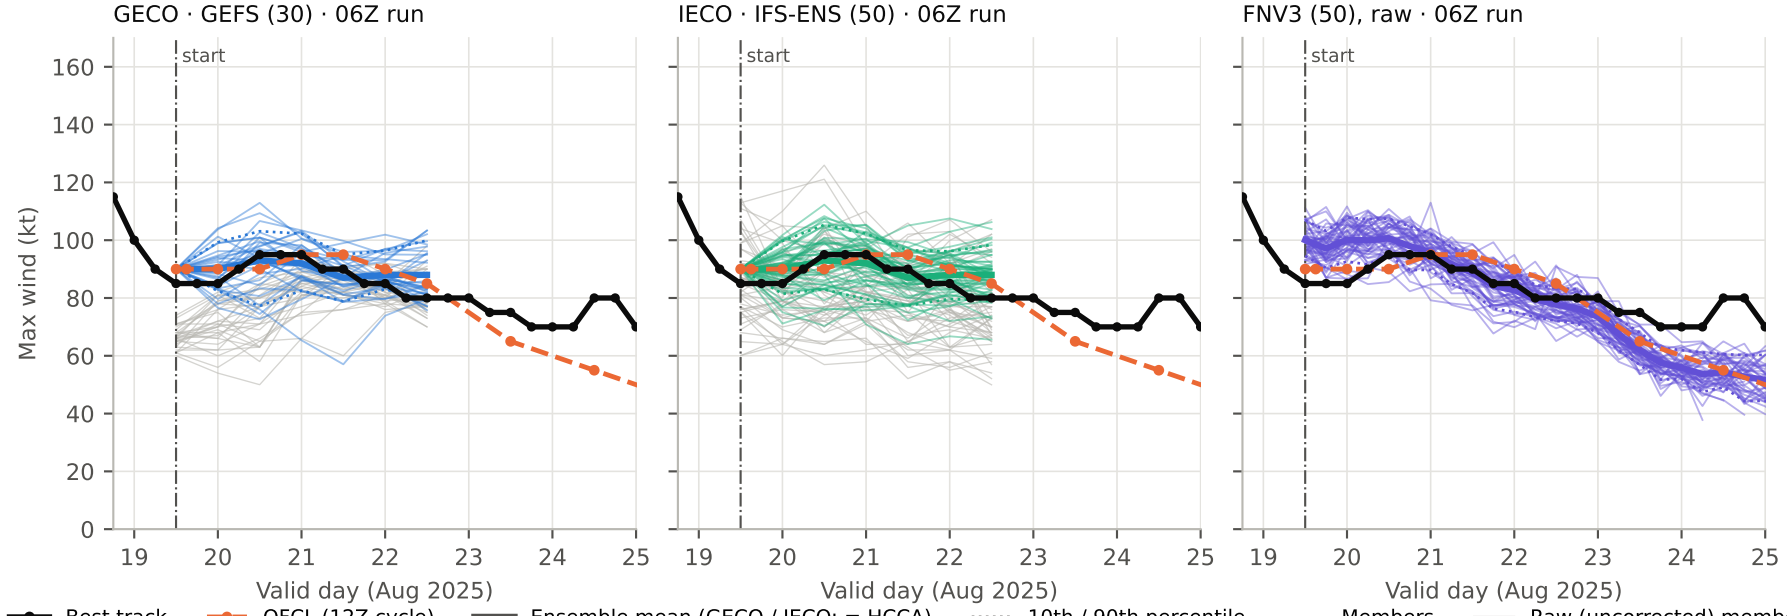

Melissa (AL132025), 25 Oct 2025, 12Z cycle / 15Z advisory: rapid intensification to 165 kt, then landfall in Jamaica

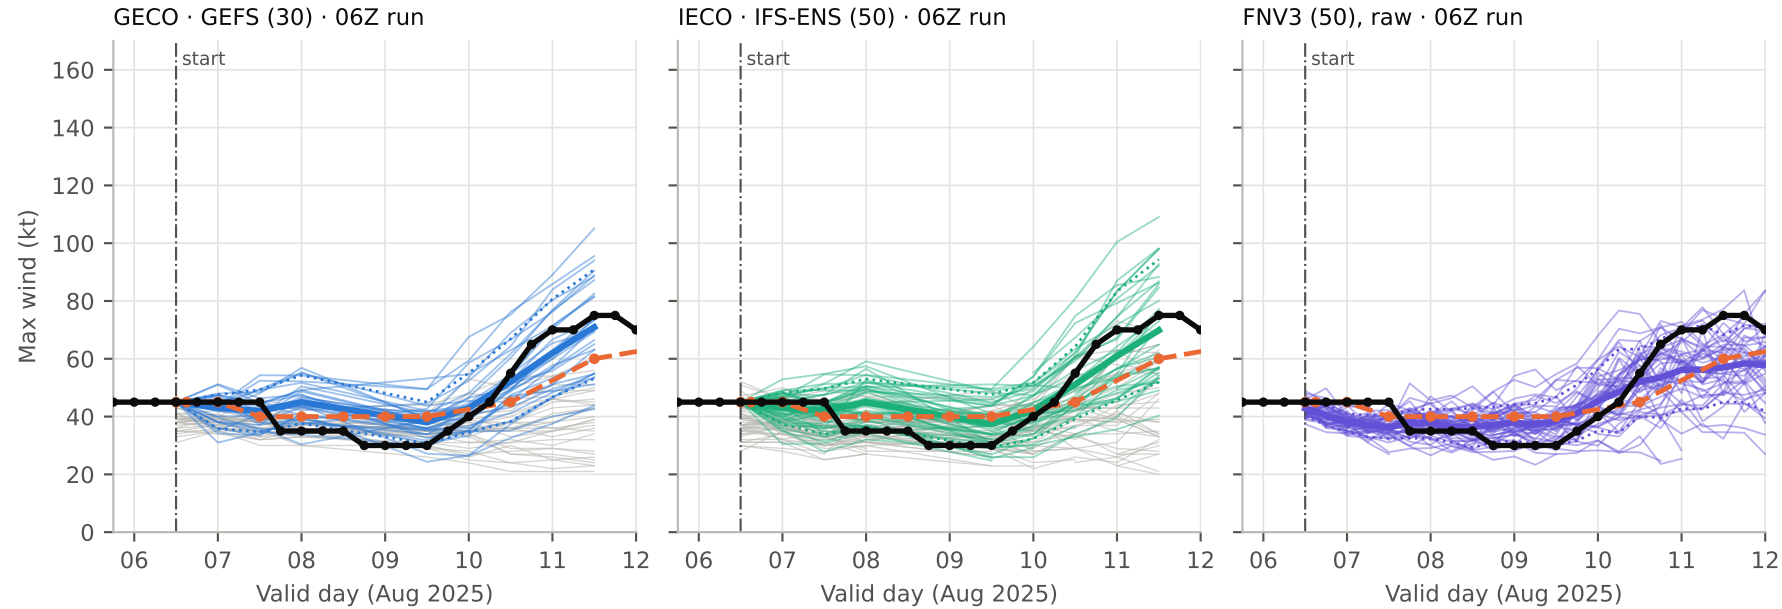

Kiko (EP112025), 01 Sep 2025, 12Z cycle / 15Z advisory: East Pacific steady intensification to Cat 4

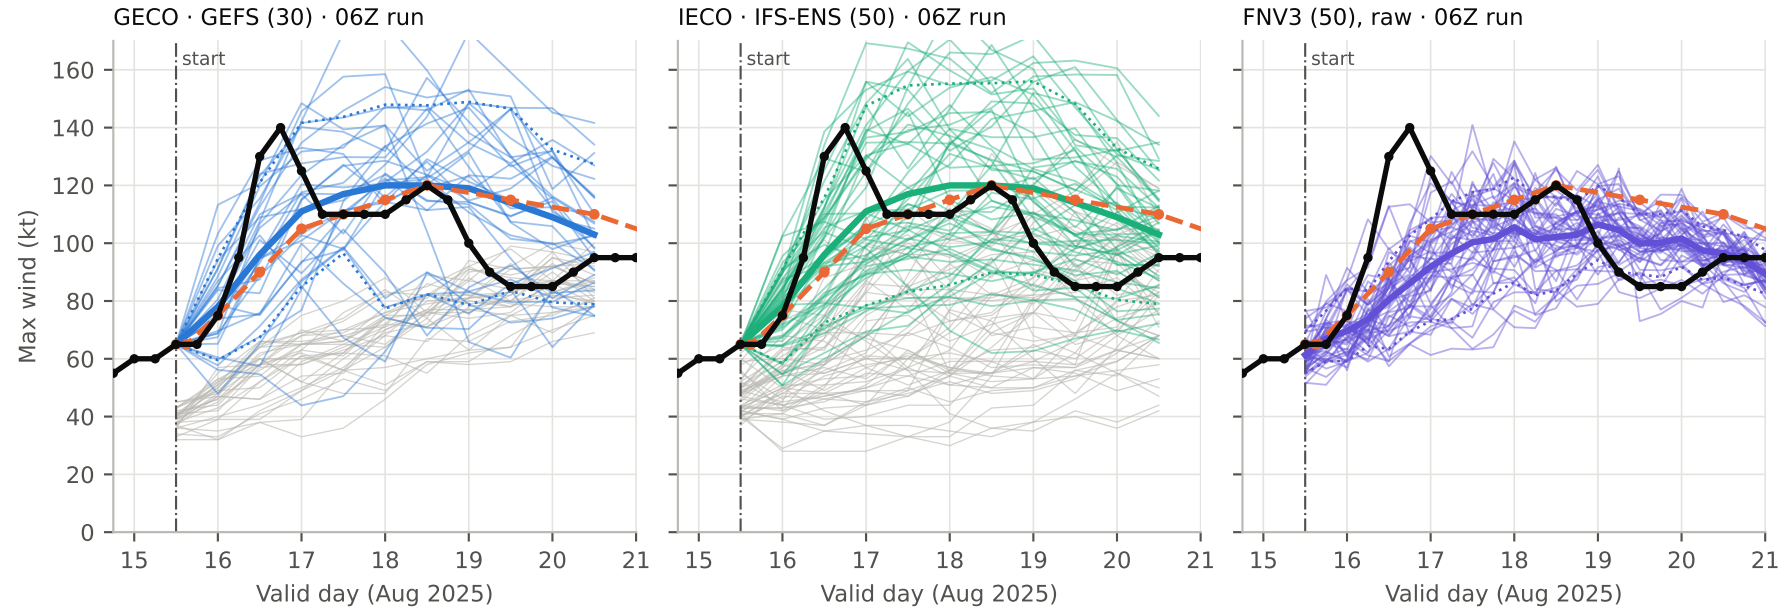

Erin (AL052025), 19 Aug 2025, 12Z cycle / 15Z advisory: recurvature and extratropical transition (weakening)

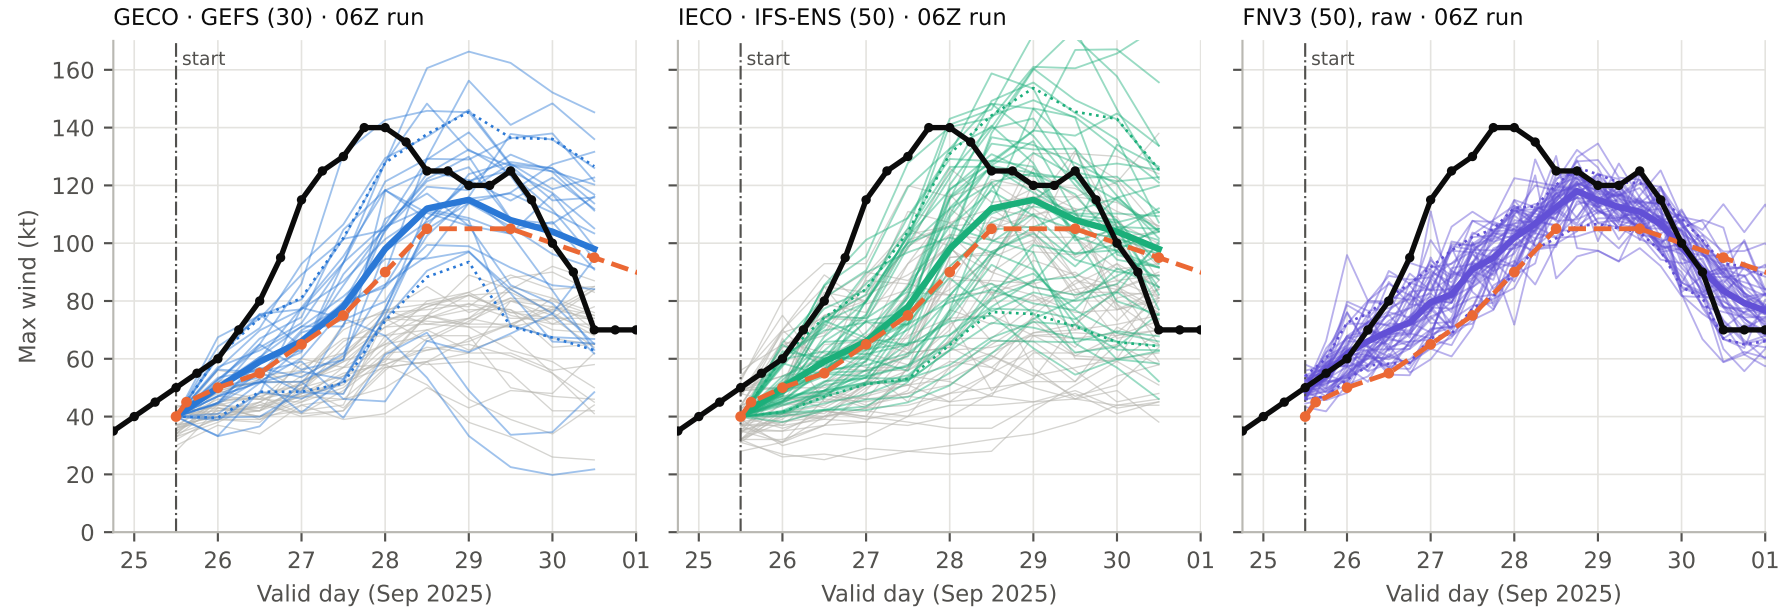

Henriette (EP082025), 06 Aug 2025, 12Z cycle / 15Z advisory: weak, long-lived tropical storm

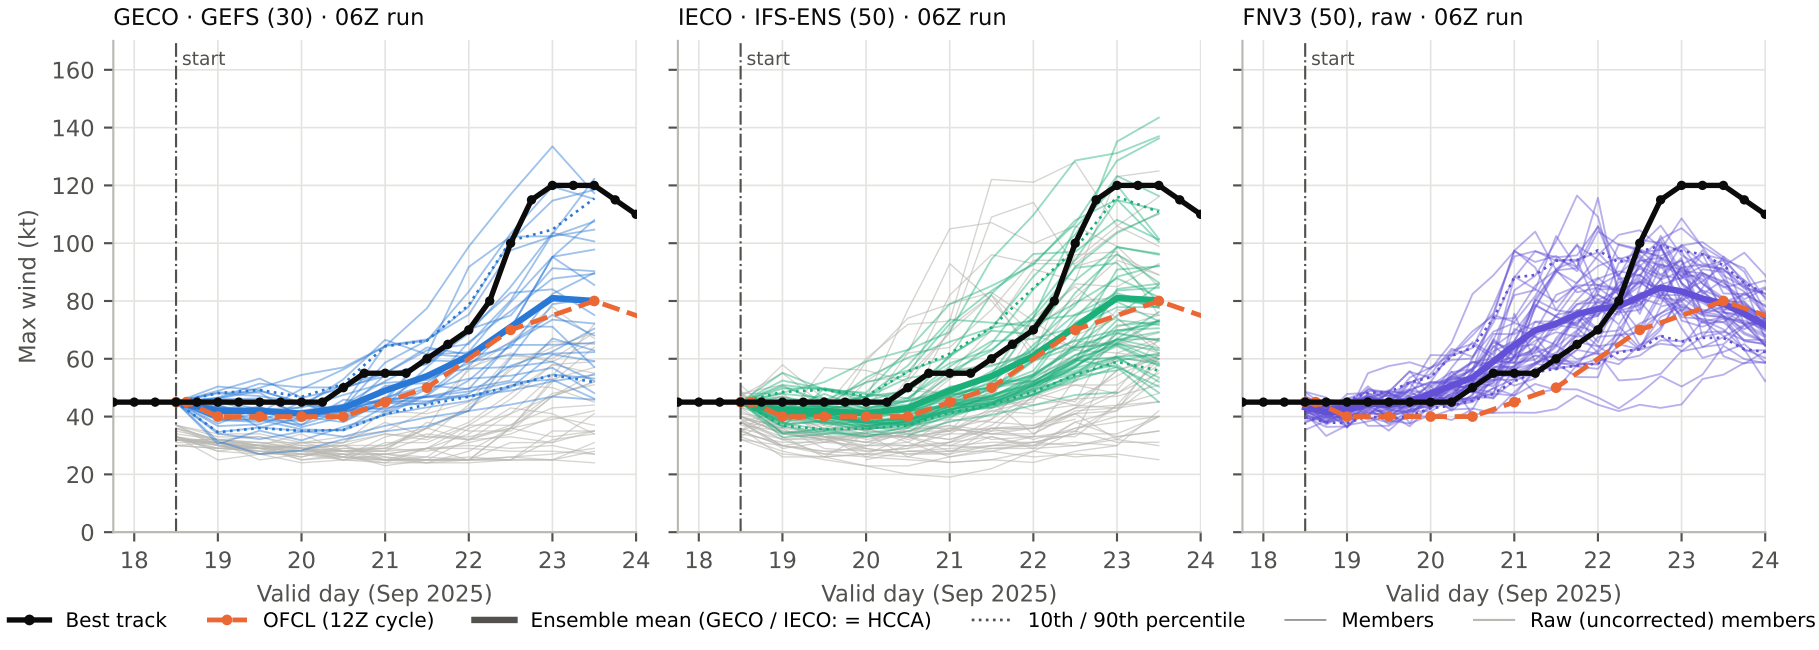

Erin (AL052025), 15 Aug 2025, 12Z cycle / 15Z advisory: about 18 h before extreme RI (65 kt -> 140 kt by 16 Aug 18Z)

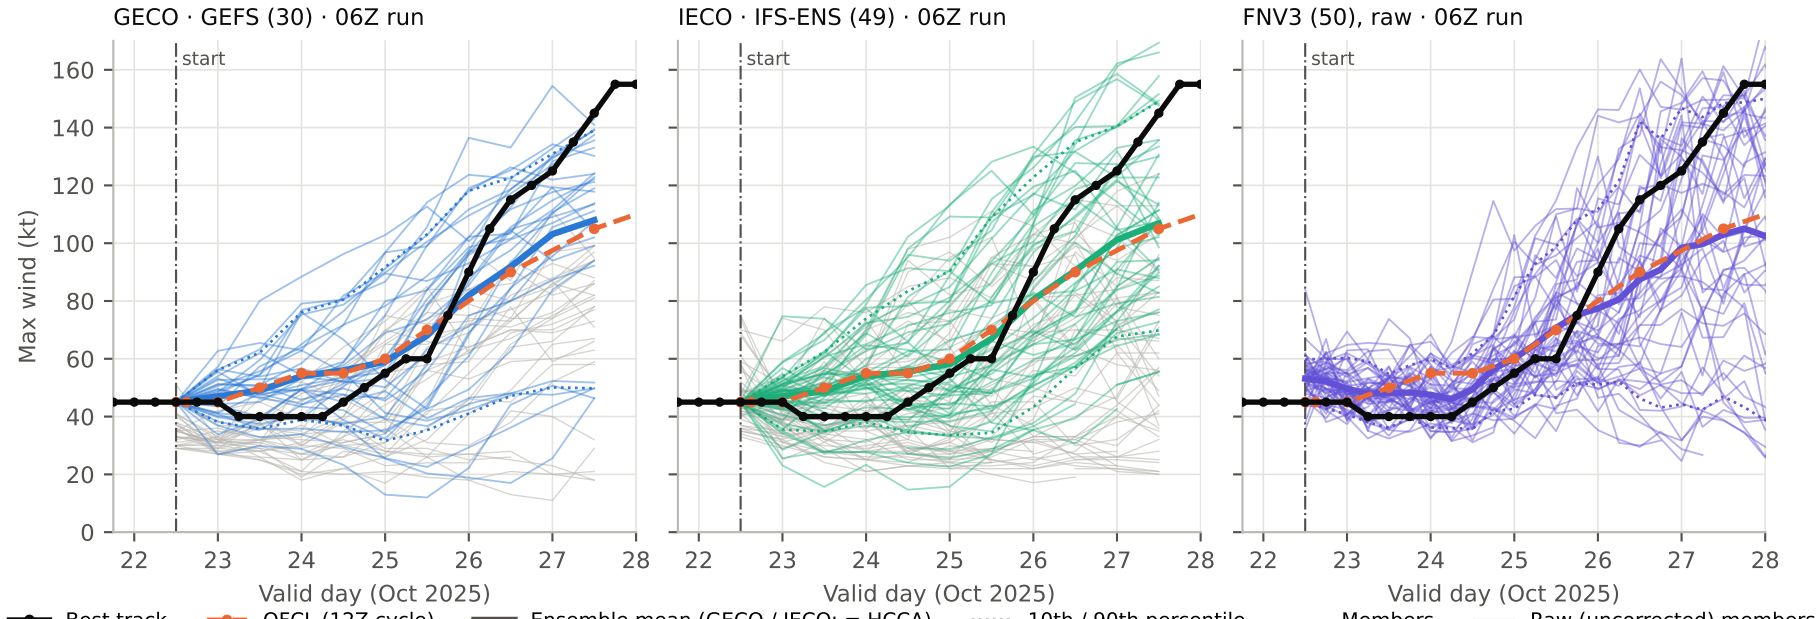

Humberto (AL082025), 25 Sep 2025, 12Z cycle / 15Z advisory: rapid intensification to 140 kt, then rapid weakening

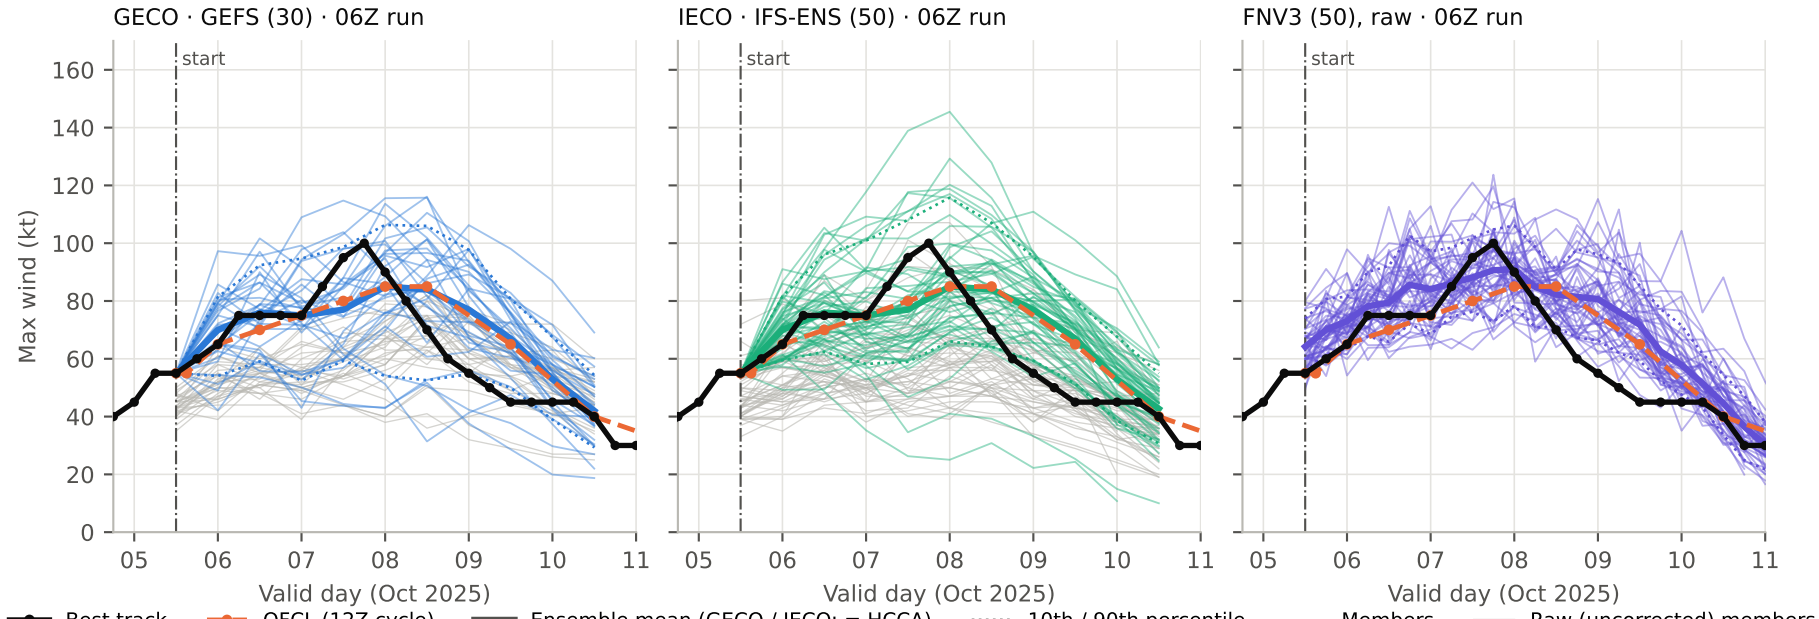

Gabrielle (AL072025), 18 Sep 2025, 12Z cycle / 15Z advisory: steady Atlantic intensification to 120 kt

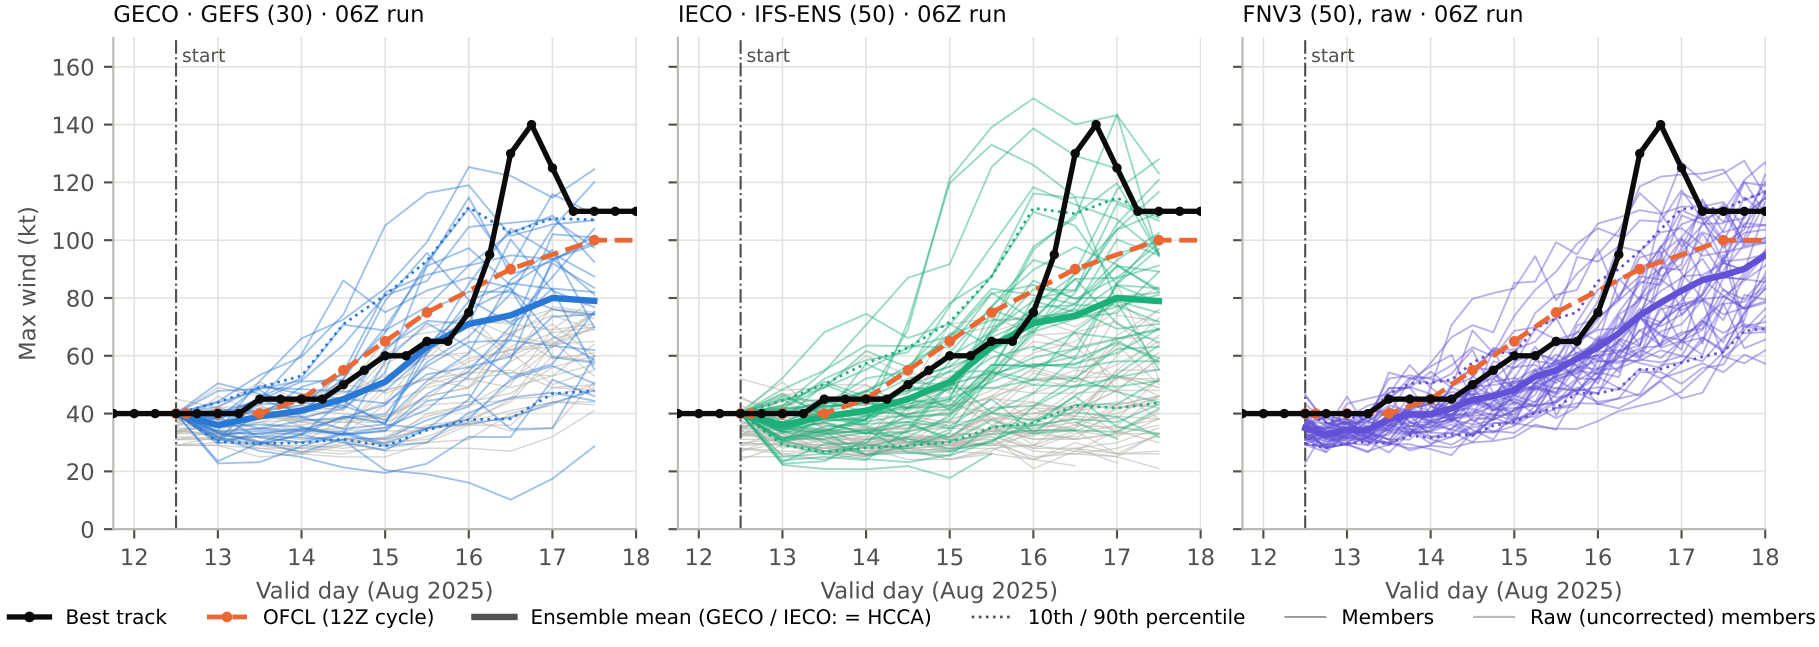

Melissa (AL132025), 22 Oct 2025, 12Z cycle / 15Z advisory: slow early phase; rapid intensification 3-4 days later

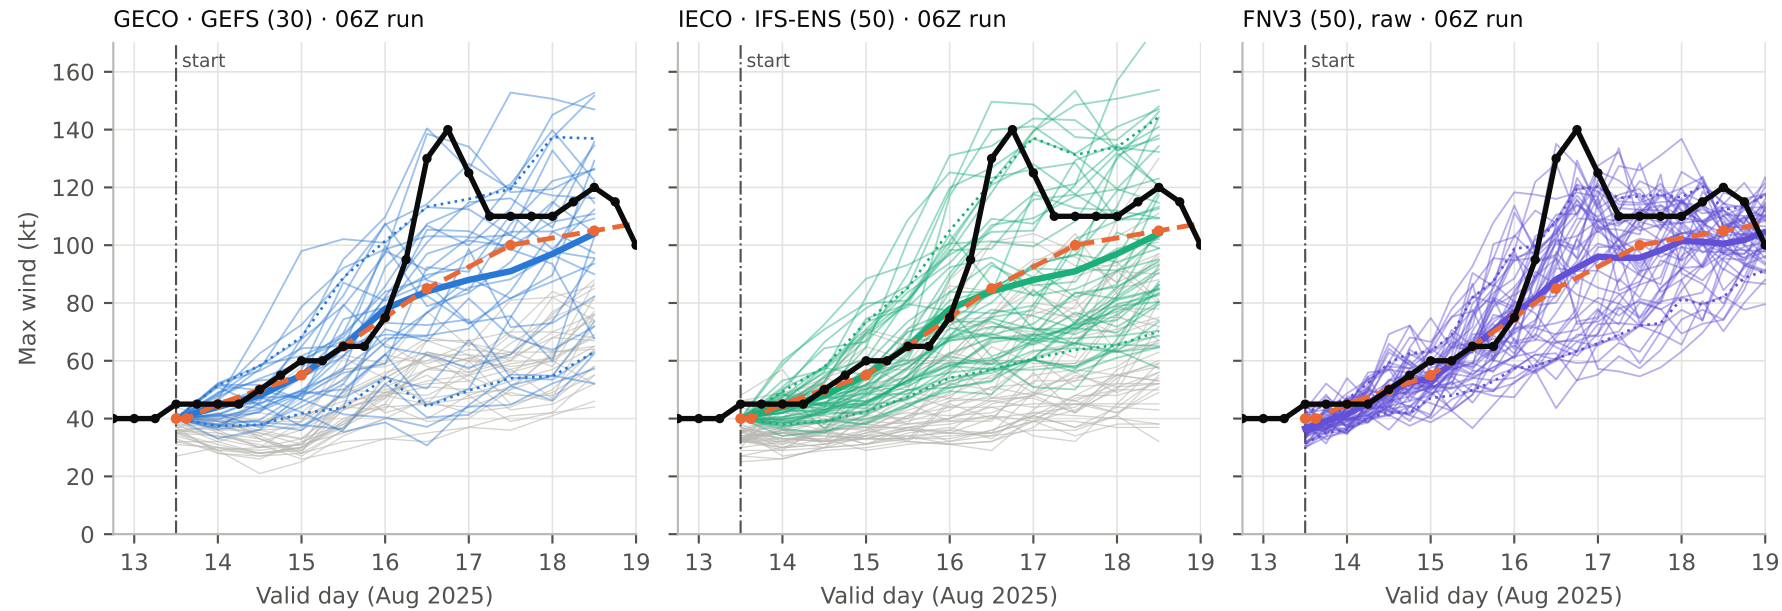

Priscilla (EP162025), 05 Oct 2025, 12Z cycle / 15Z advisory: East Pacific intensification, then decay over cooler water

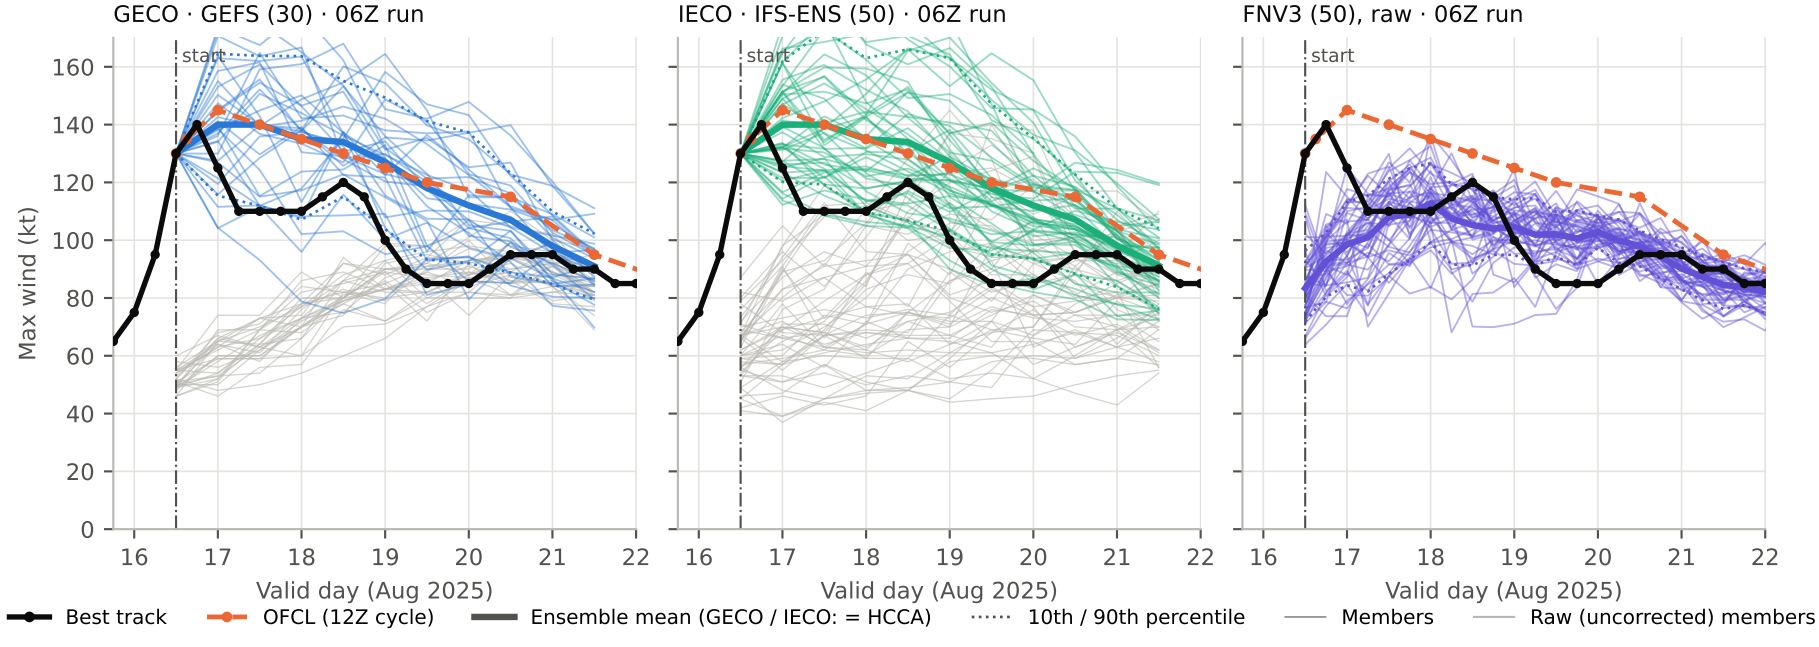

Erin (AL052025), 12 Aug 2025, 12Z cycle / 15Z advisory: four days before extreme RI

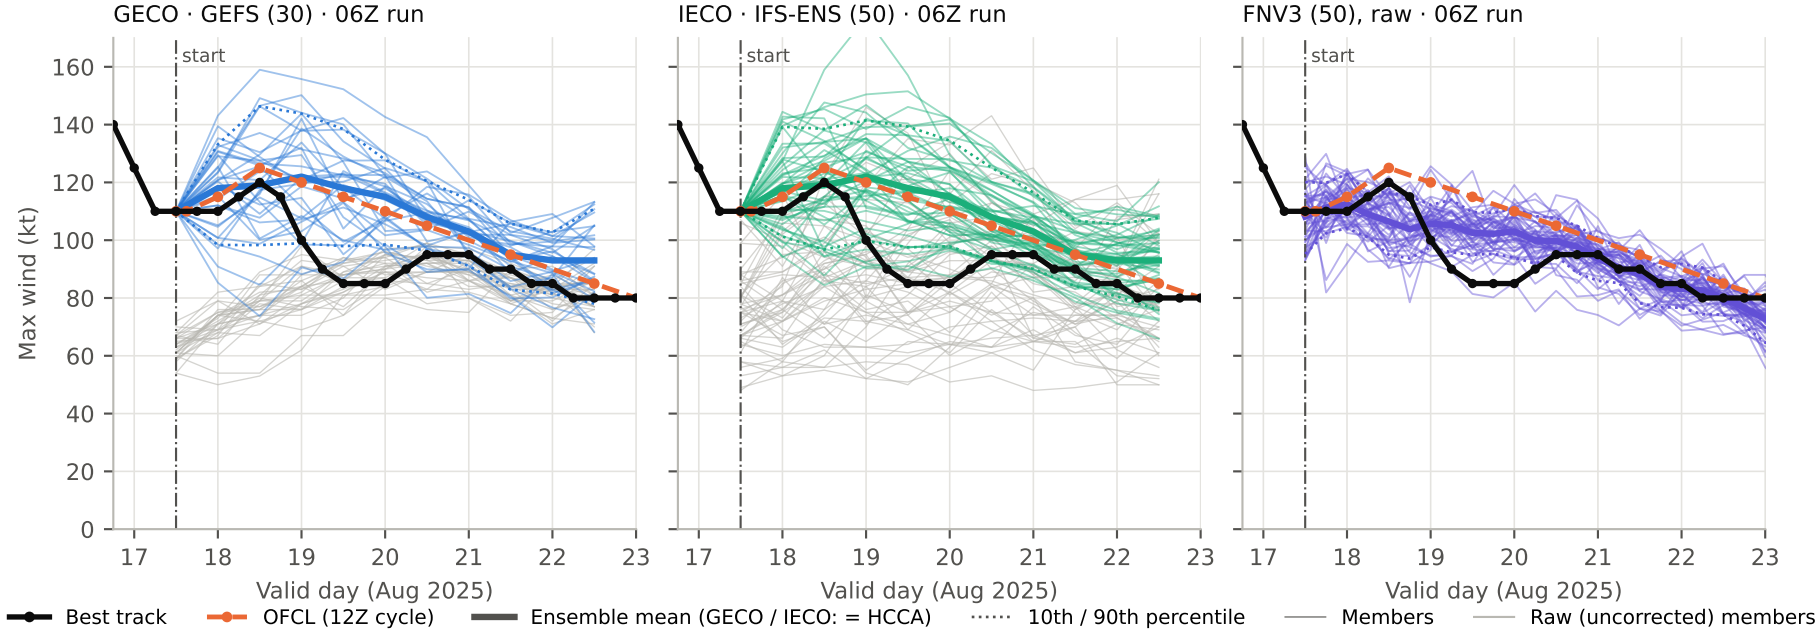

Erin (AL052025), 13 Aug 2025, 12Z cycle / 15Z advisory: three days before extreme RI

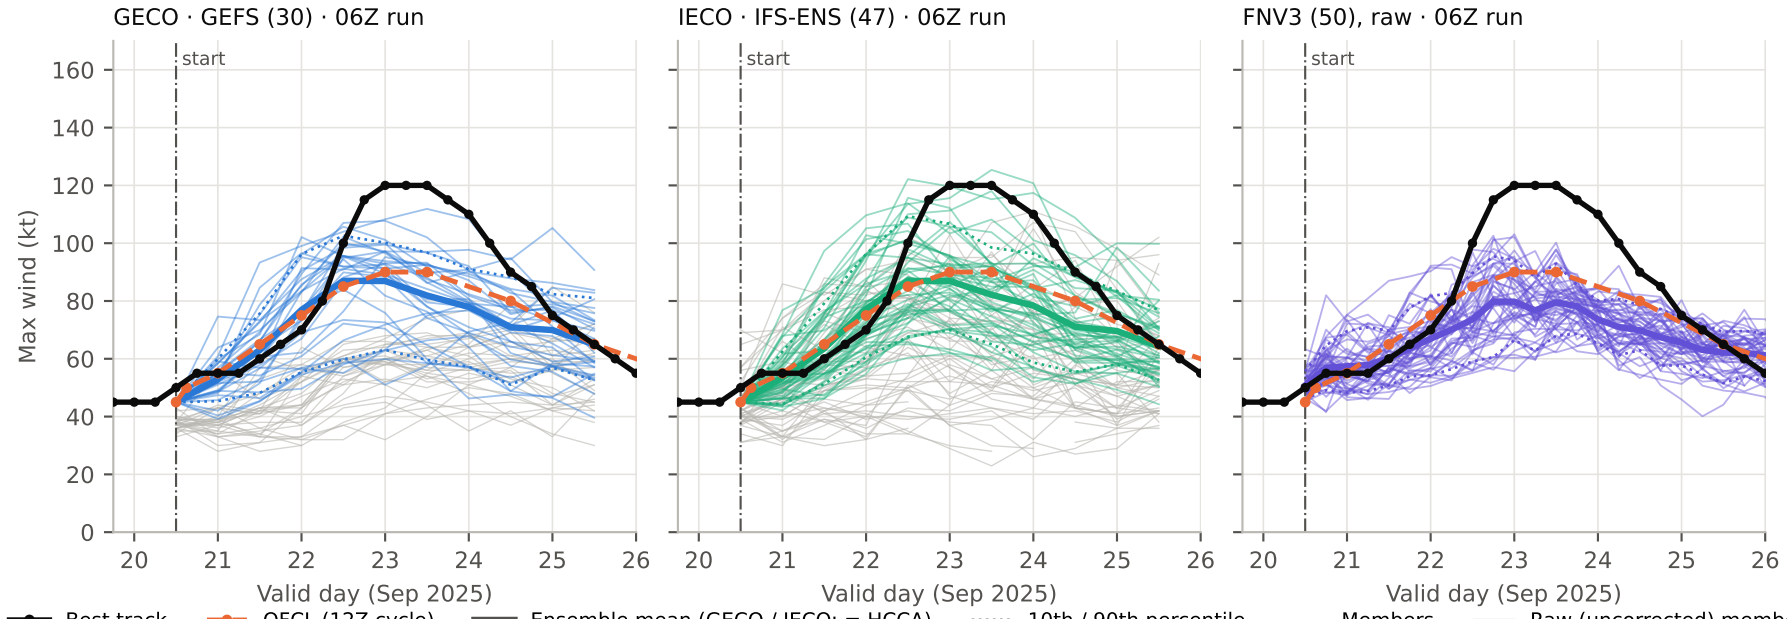

Erin (AL052025), 16 Aug 2025, 12Z cycle / 15Z advisory: mid-RI (95 kt at 06Z, 130 kt at 12Z), peak 140 kt, then eyewall cycles and weakening

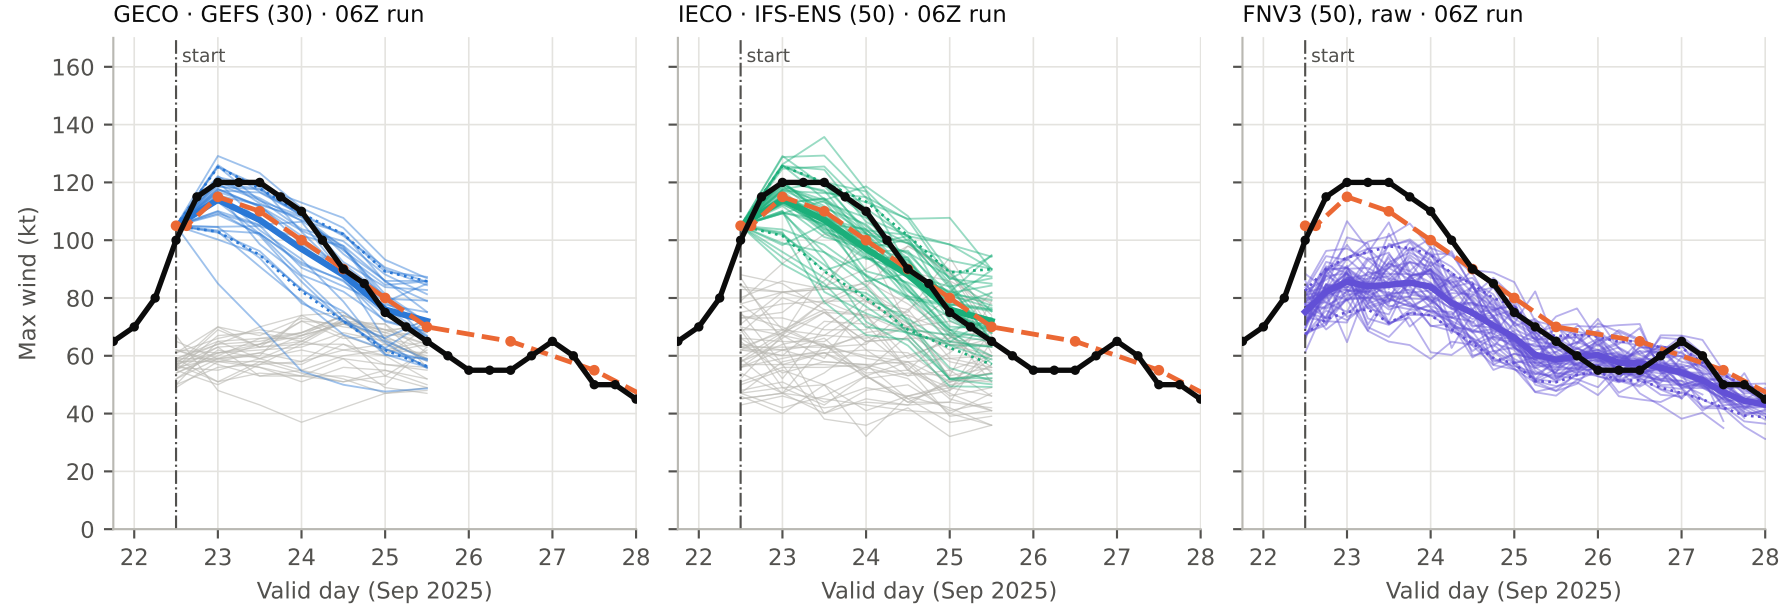

Erin (AL052025), 17 Aug 2025, 12Z cycle / 15Z advisory: reintensification to 120 kt, then weakening

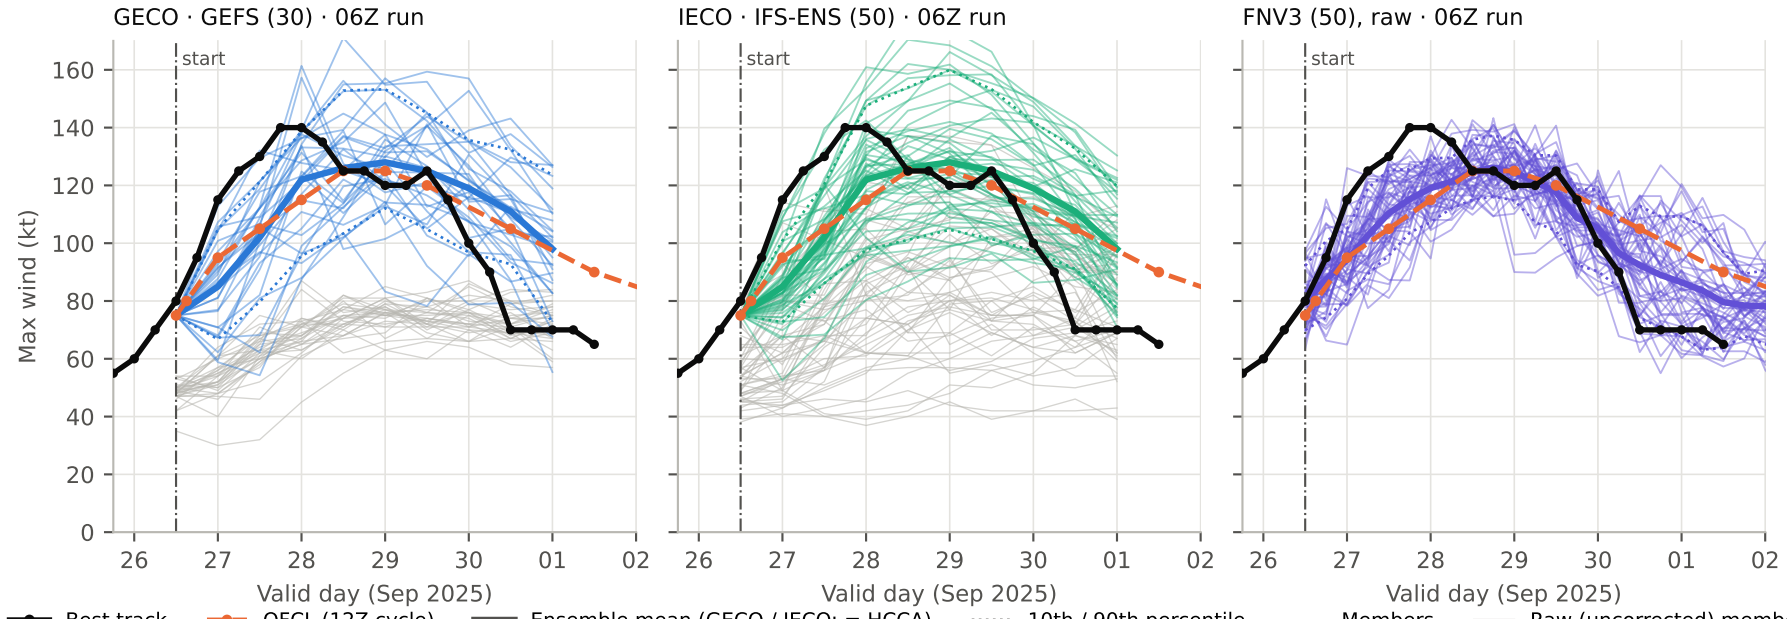

Gabrielle (AL072025), 20 Sep 2025, 12Z cycle / 15Z advisory: two days before rapid intensification to 120 kt

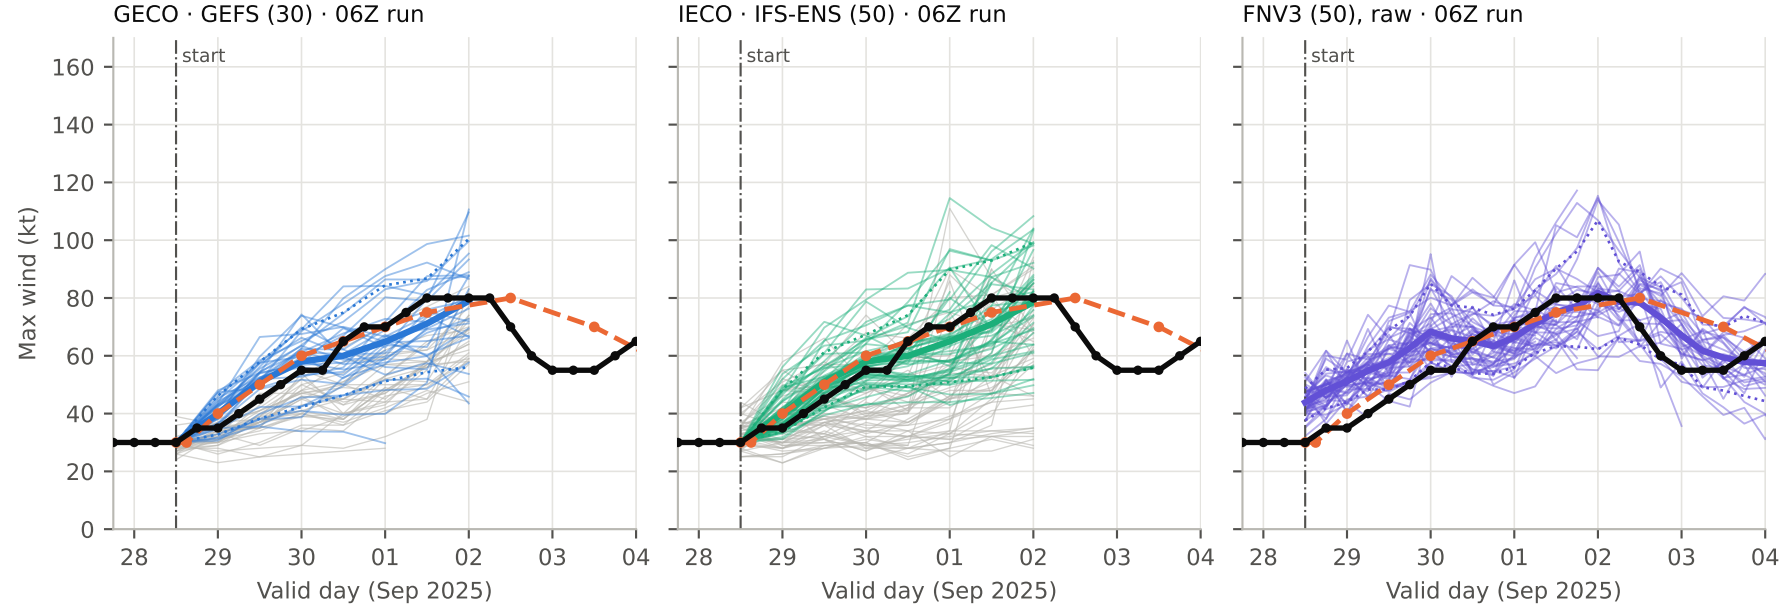

Gabrielle (AL072025), 22 Sep 2025, 12Z cycle / 15Z advisory: during rapid intensification, then fast weakening

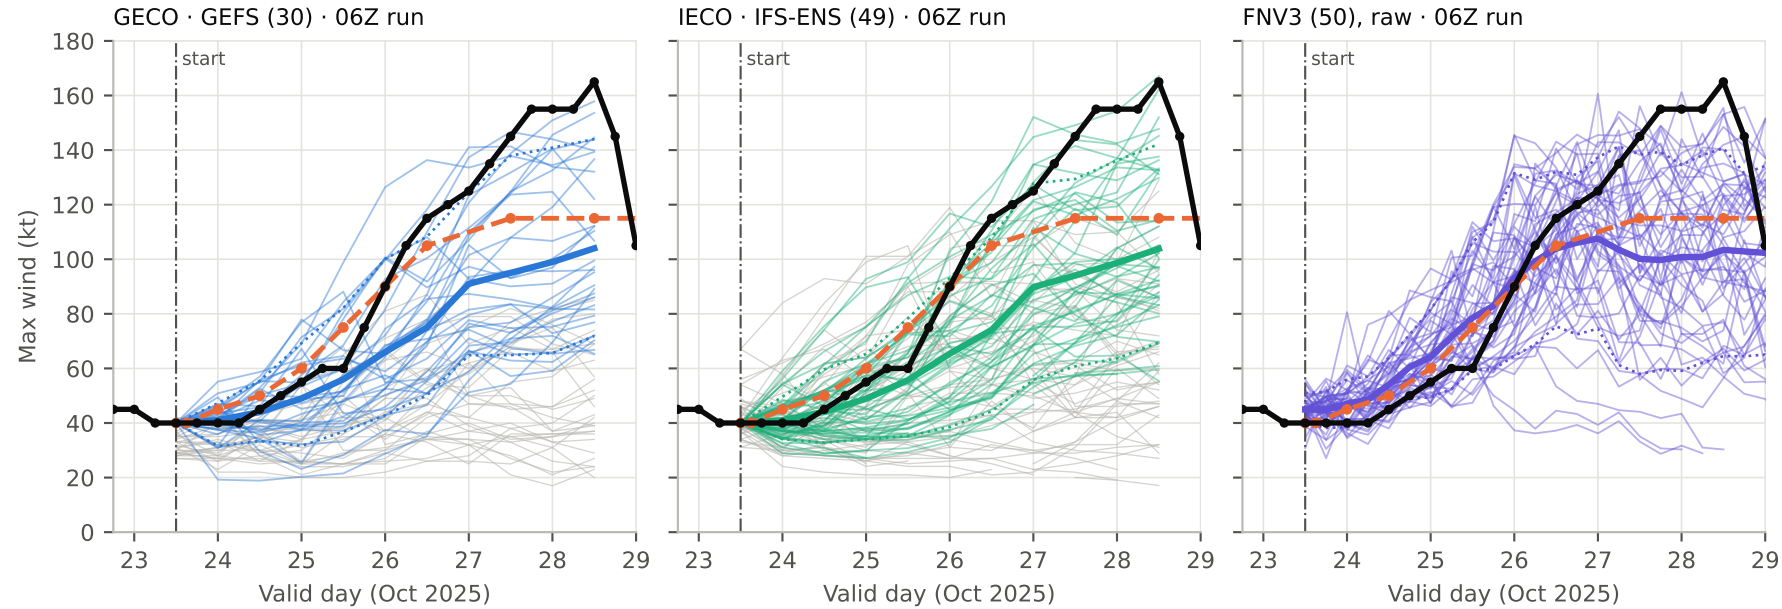

Humberto (AL082025), 26 Sep 2025, 12Z cycle / 15Z advisory: midway through rapid intensification (80 -> 140 kt)

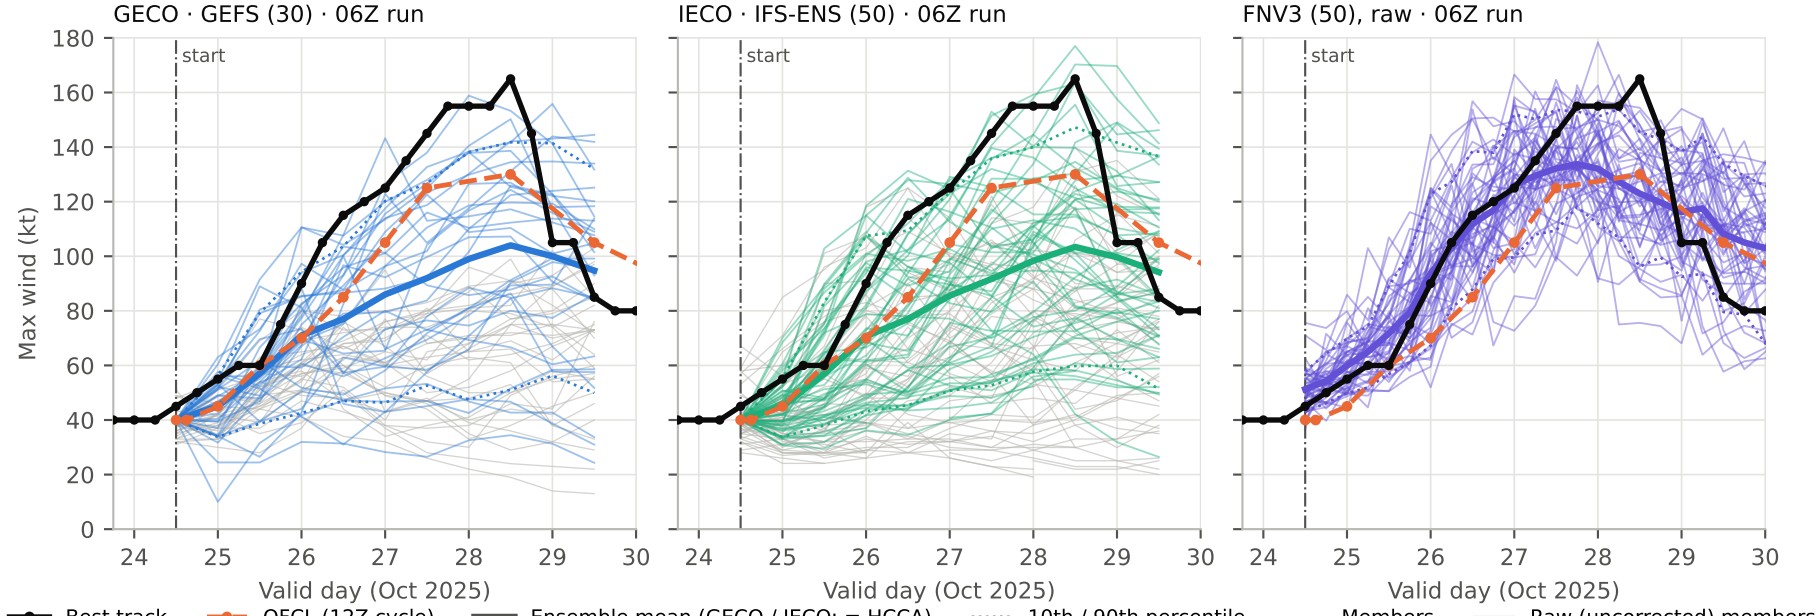

Imelda (AL092025), 28 Sep 2025, 12Z cycle / 15Z advisory: depression to 80 kt hurricane

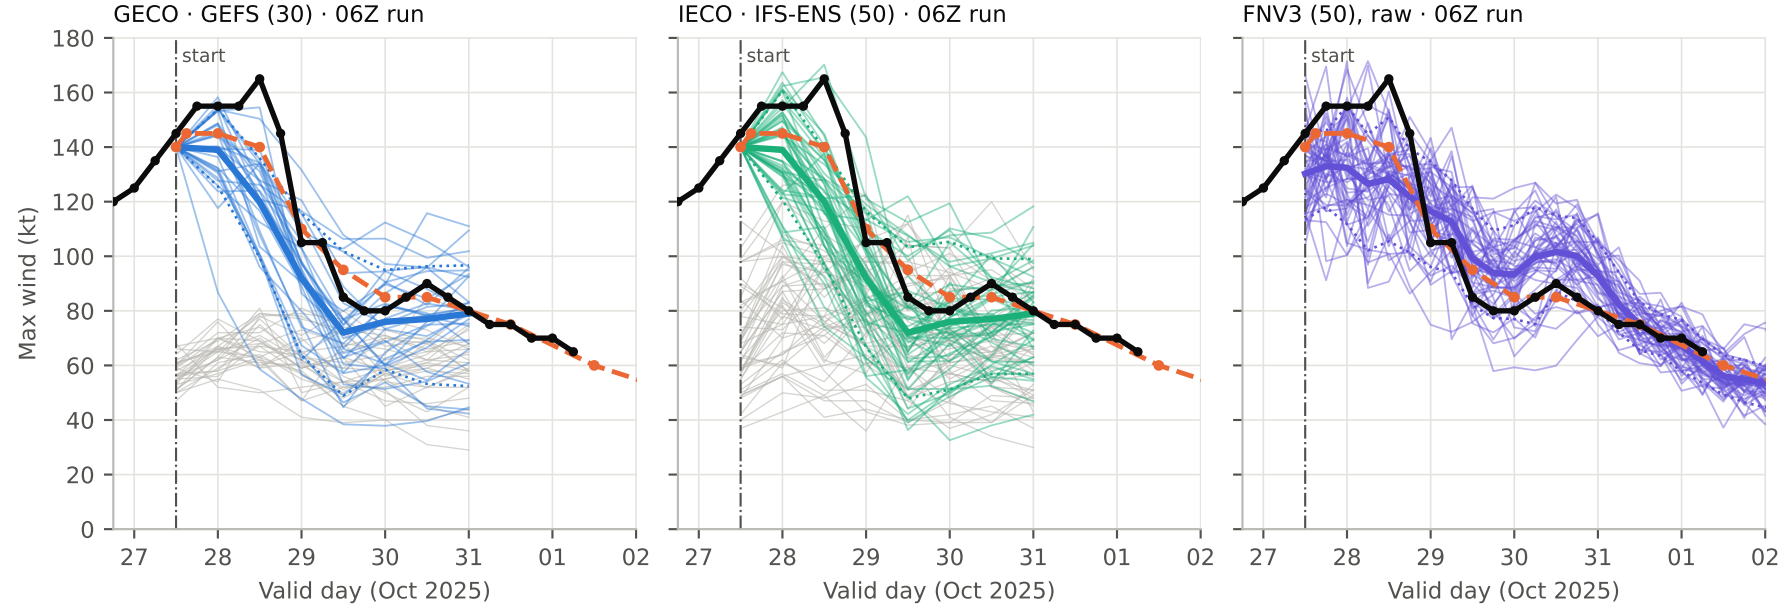

Melissa (AL132025), 23 Oct 2025, 12Z cycle / 15Z advisory: 40 kt, five days before a 165 kt peak

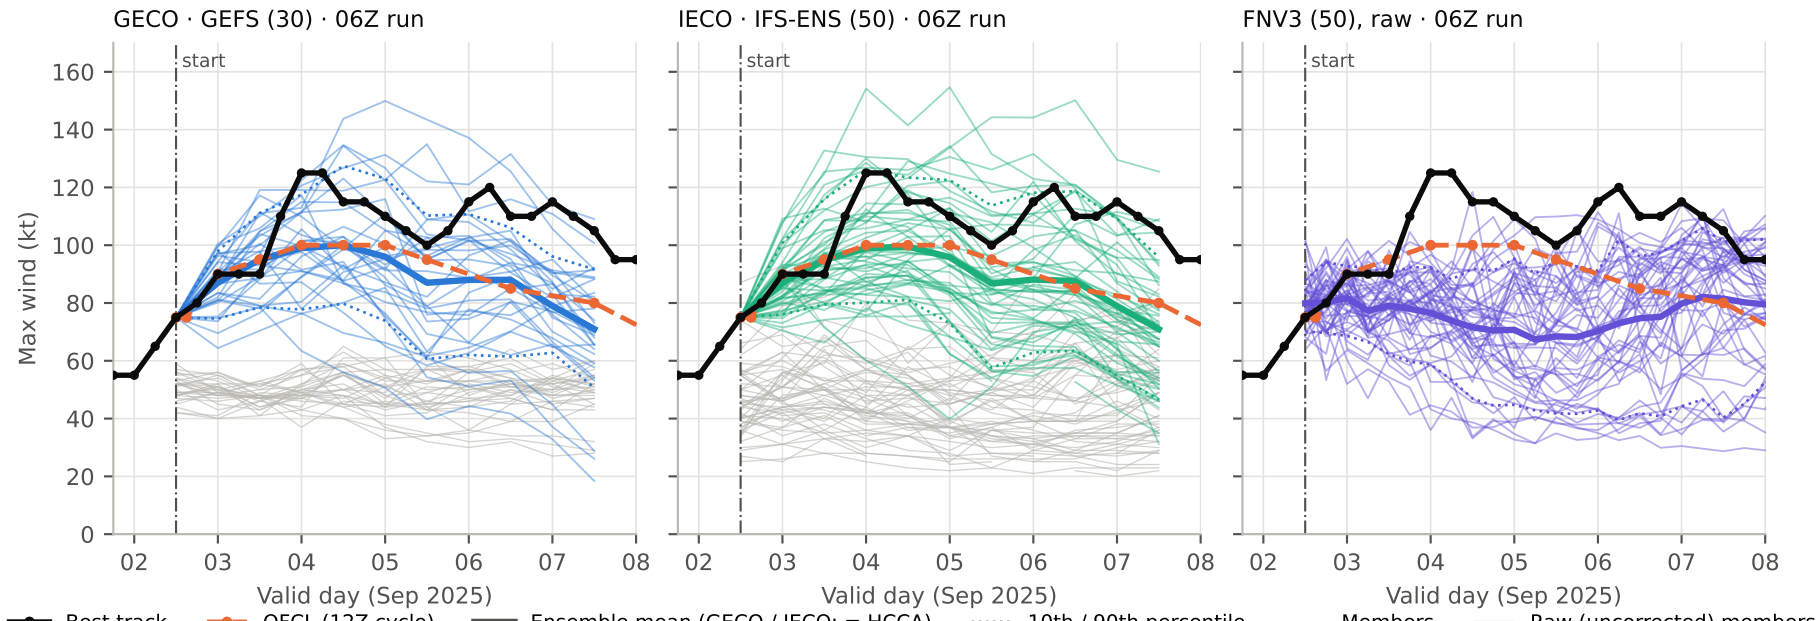

Melissa (AL132025), 24 Oct 2025, 12Z cycle / 15Z advisory: four days before the peak

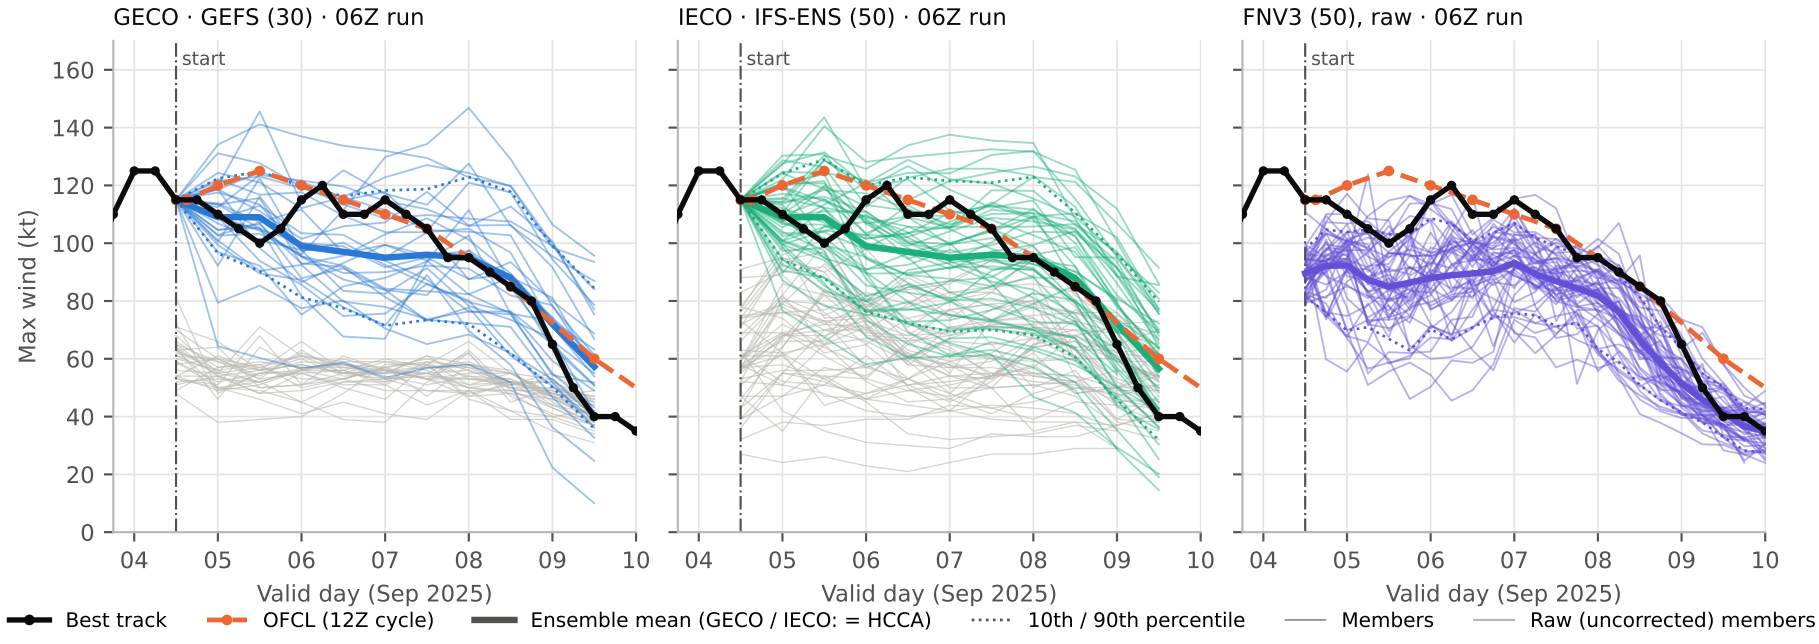

Melissa (AL132025), 27 Oct 2025, 12Z cycle / 15Z advisory: 145 kt and still strengthening to 165 kt; landfall in Jamaica, then Cuba

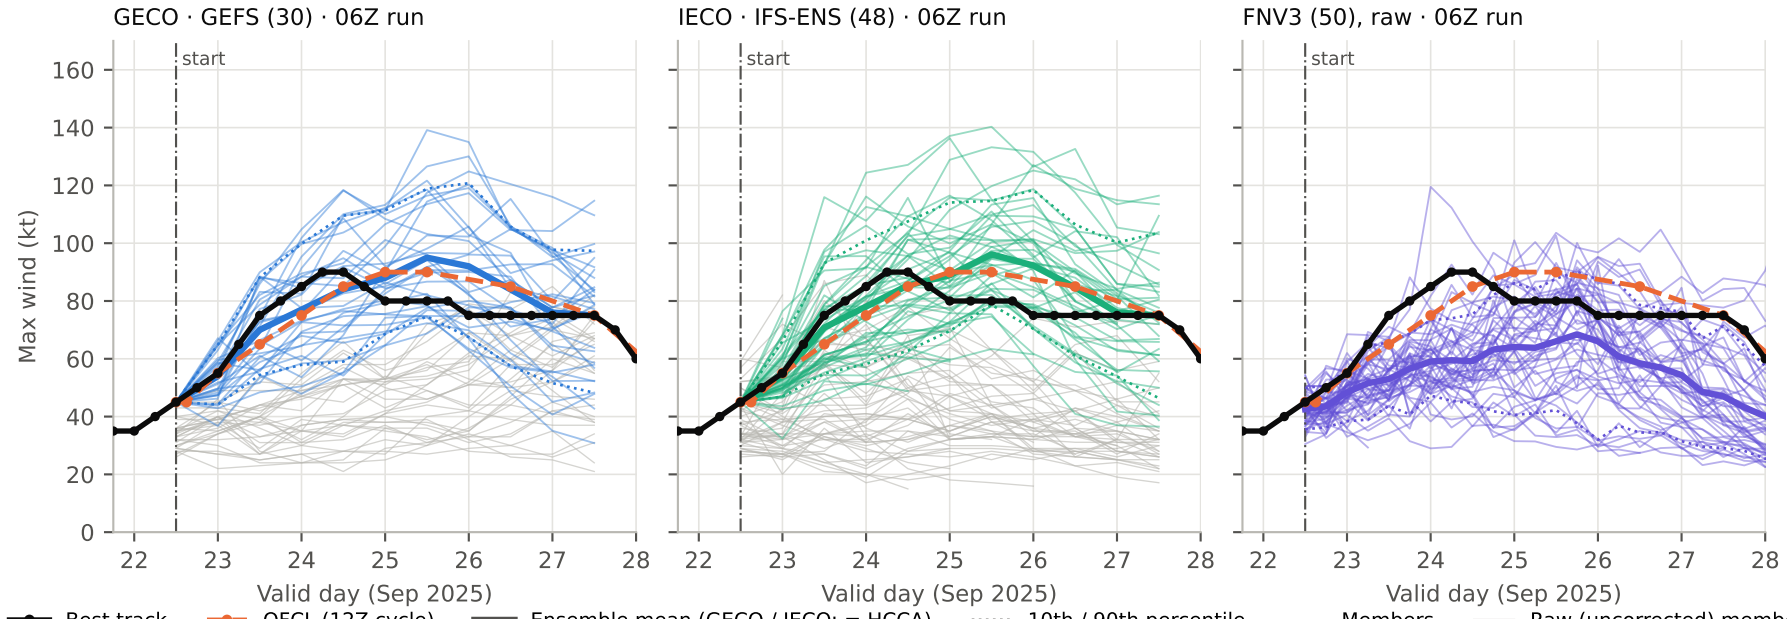

Kiko (EP112025), 02 Sep 2025, 12Z cycle / 15Z advisory: intensifying hurricane, peak 125 kt two days later

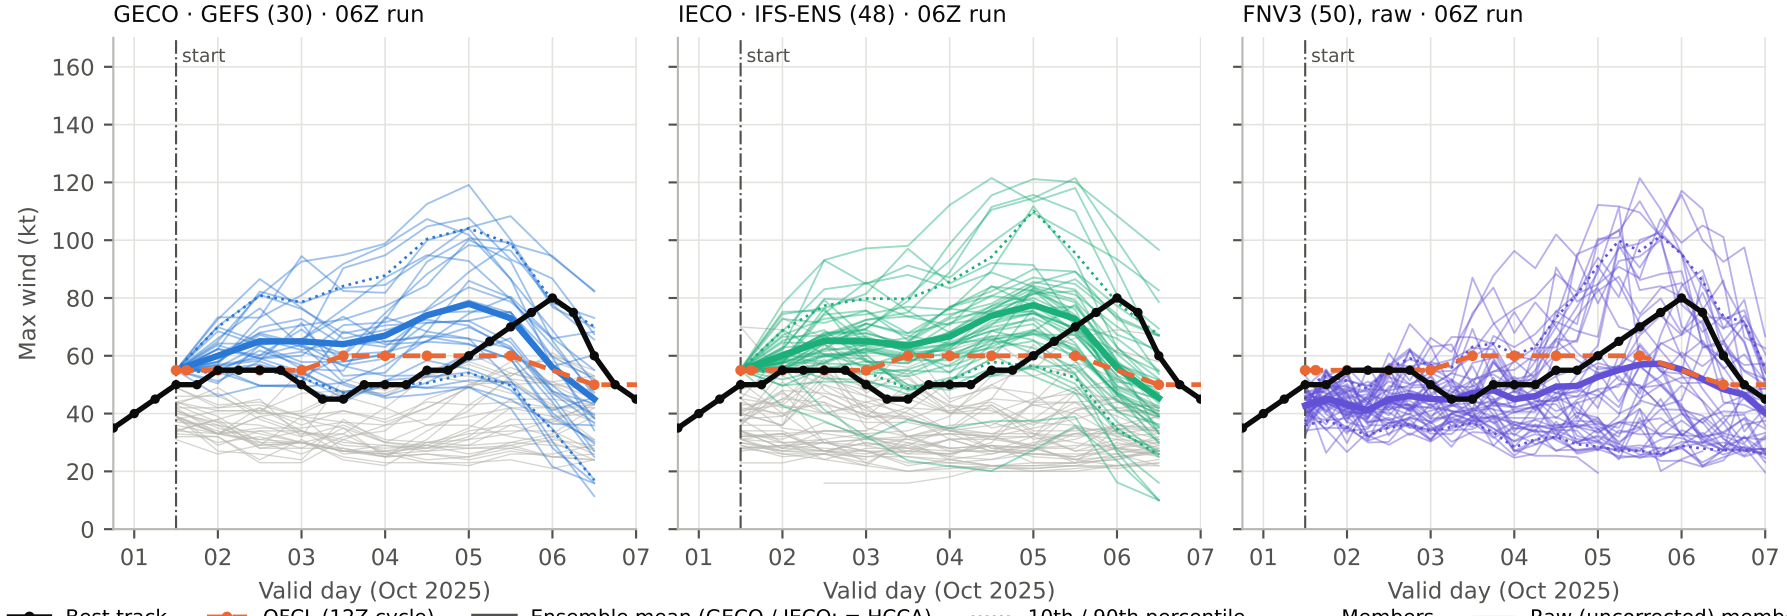

Kiko (EP112025), 04 Sep 2025, 12Z cycle / 15Z advisory: near peak, then steady decay over cooler water

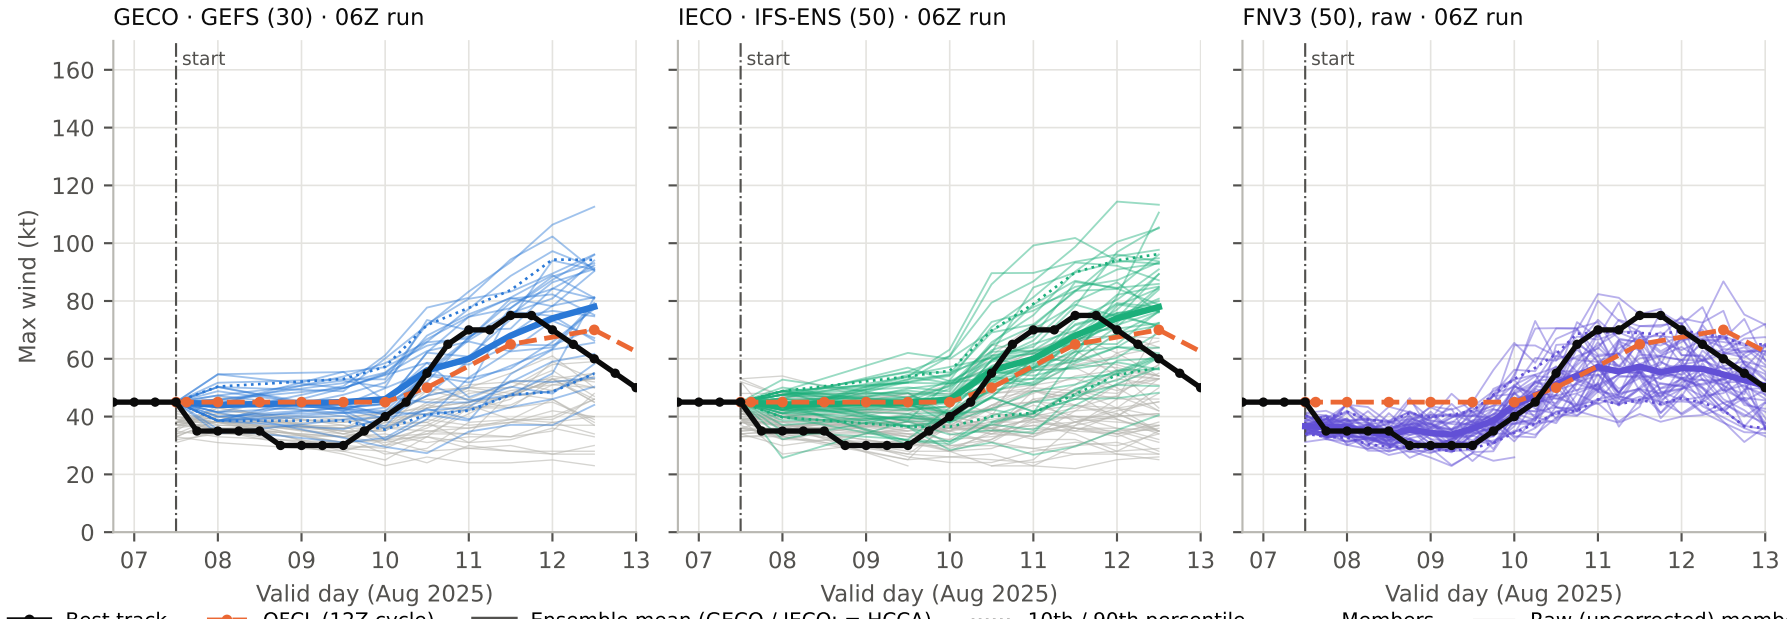

Narda (EP142025), 22 Sep 2025, 12Z cycle / 15Z advisory: intensification to 90 kt, then decay

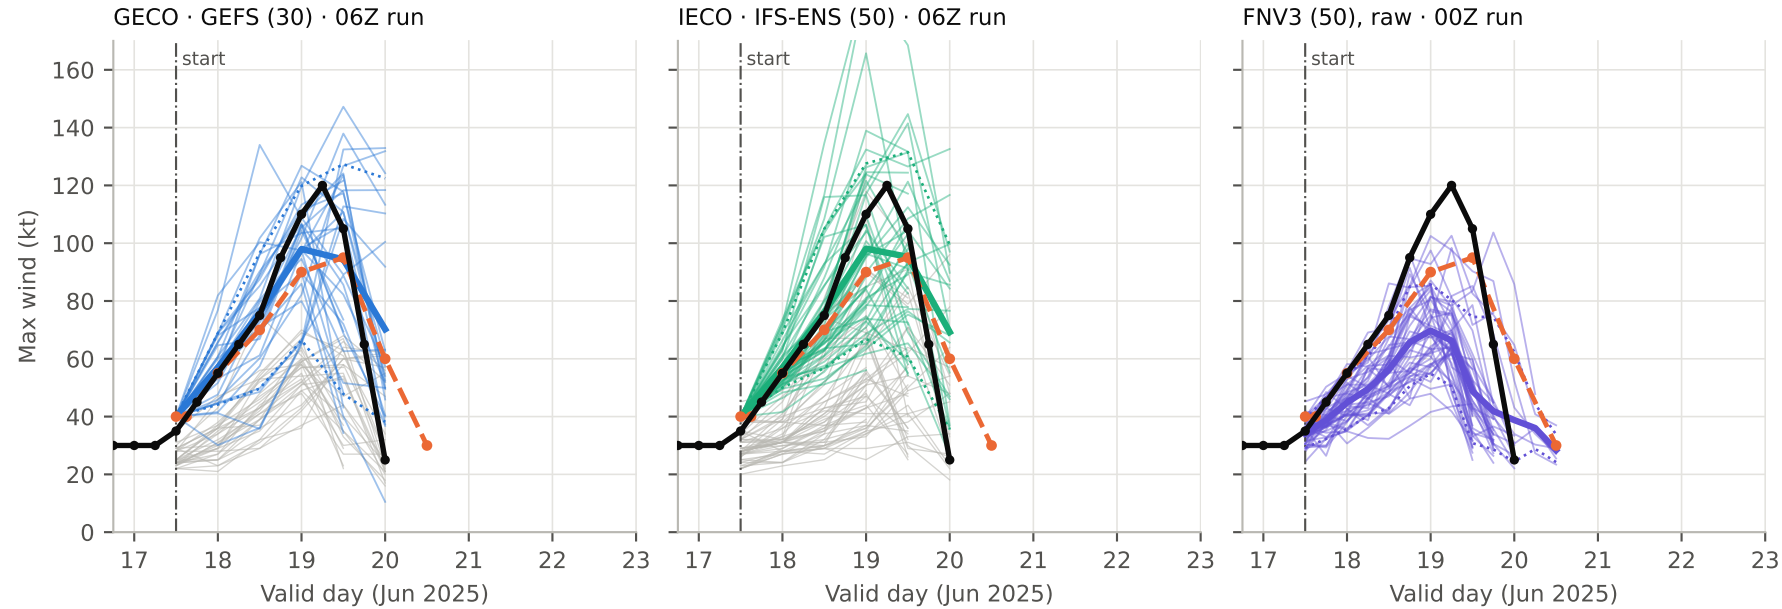

Octave (EP152025), 01 Oct 2025, 12Z cycle / 15Z advisory: long-lived moderate storm

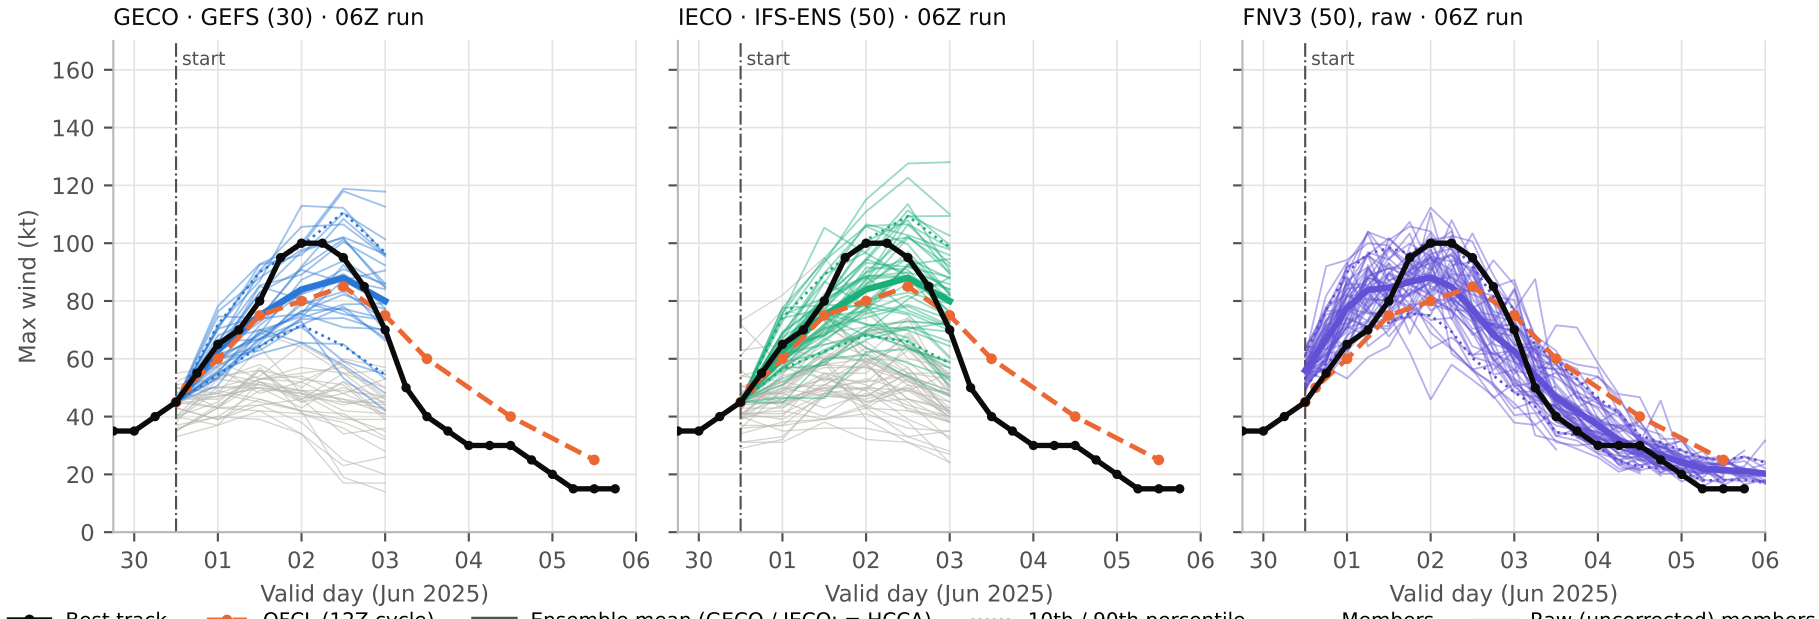

Henriette (EP082025), 07 Aug 2025, 12Z cycle / 15Z advisory: weak storm with a late, brief strengthening

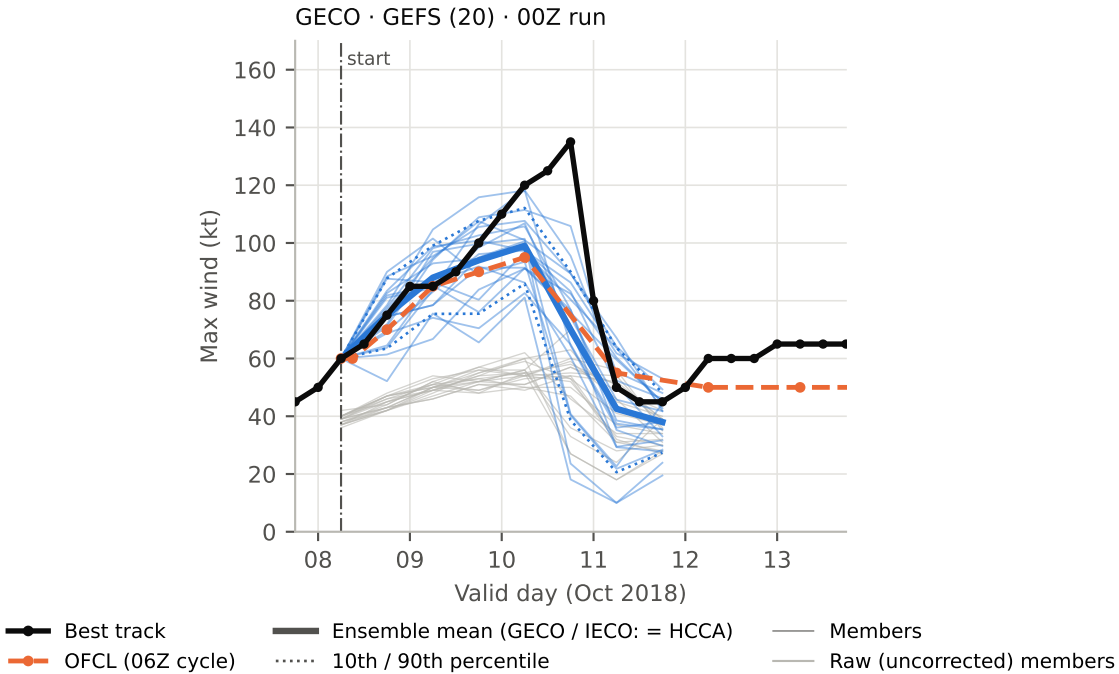

Erick (EP052025), 17 Jun 2025, 12Z cycle / 15Z advisory: East Pacific rapid intensification to 120 kt (35 kt start)

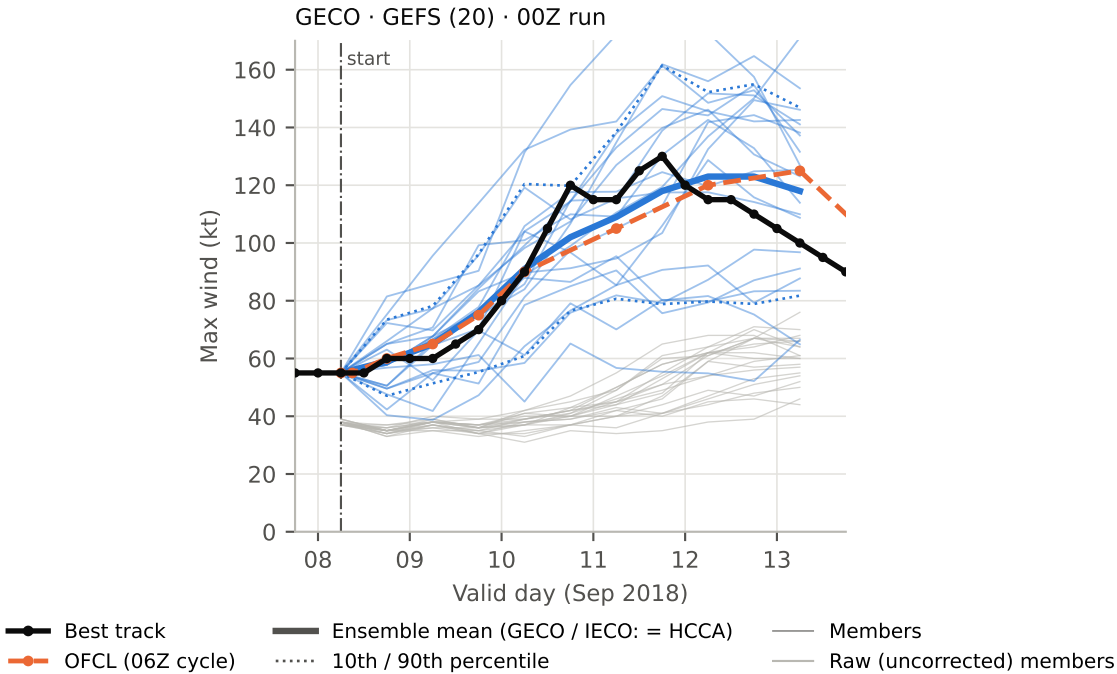

Flossie (EP062025), 30 Jun 2025, 12Z cycle / 15Z advisory: rapid intensification to 100 kt, then quick decay

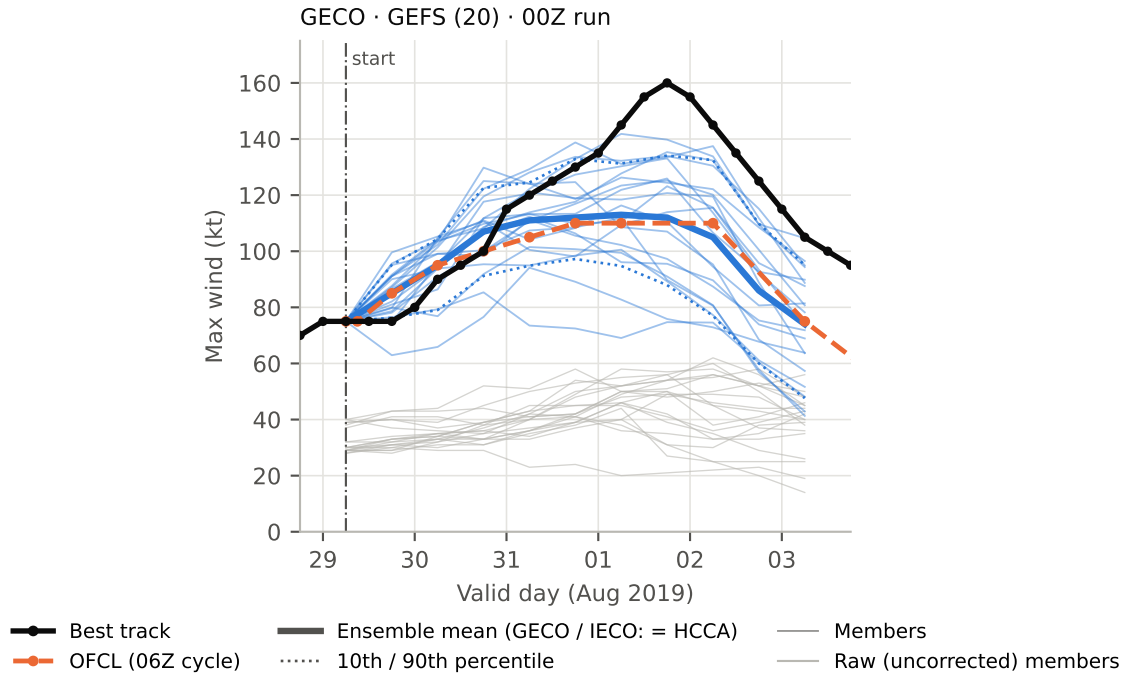

Michael (AL142018), 08 Oct 2018, 06Z cycle / 09Z advisory: rapid intensification to 135 kt at the Florida landfall

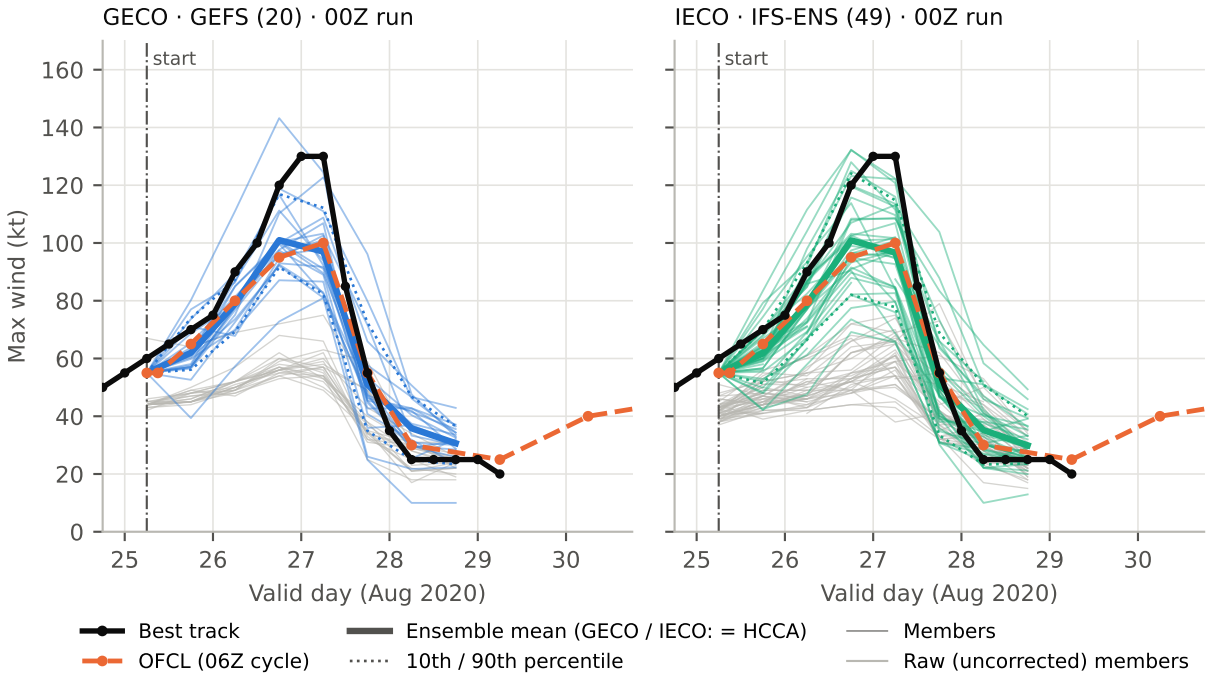

Florence (AL062018), 08 Sep 2018, 06Z cycle / 09Z advisory: rapid intensification to 130 kt

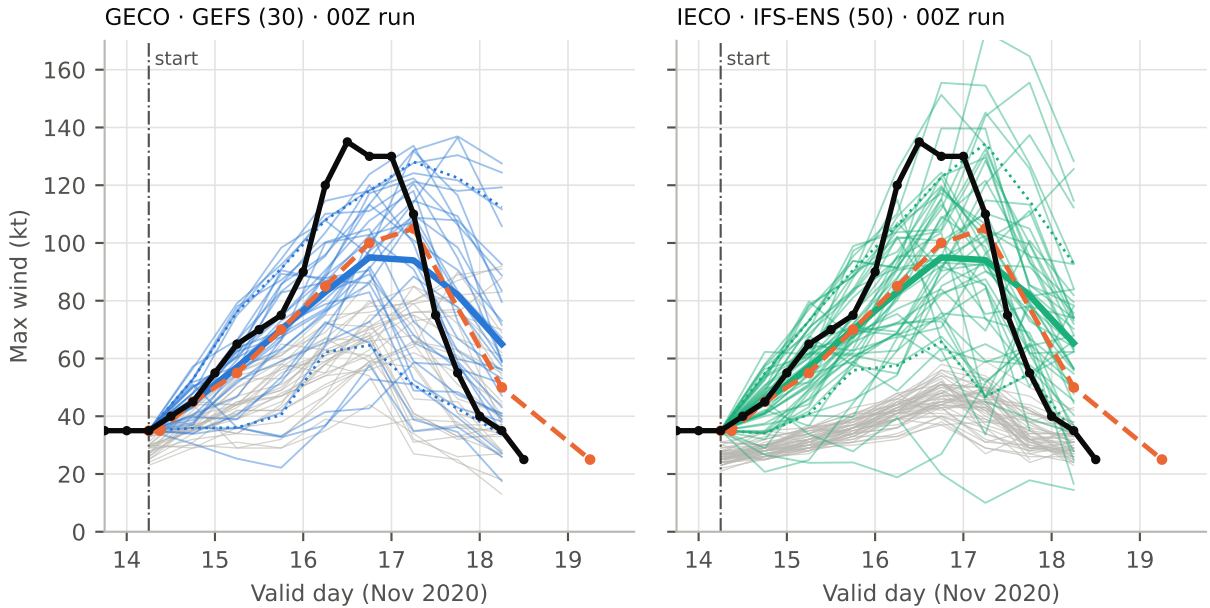

Dorian (AL052019), 29 Aug 2019, 06Z cycle / 09Z advisory: intensification to 160 kt over the Bahamas

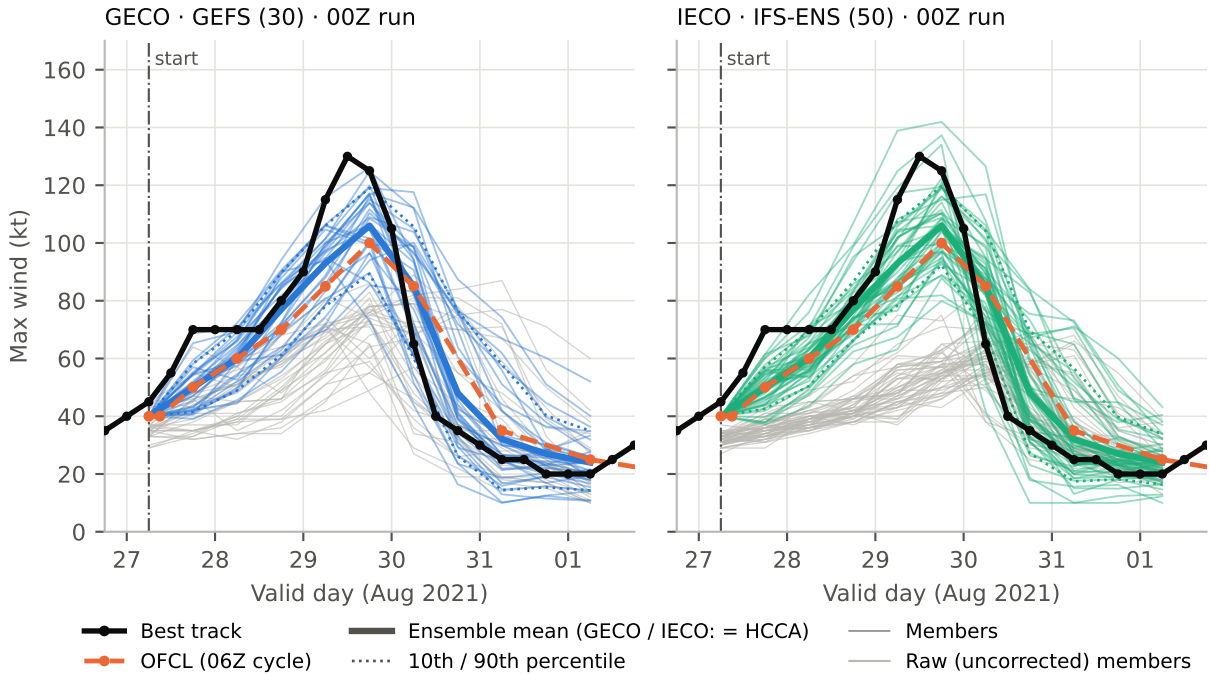

Laura (AL132020), 25 Aug 2020, 06Z cycle / 09Z advisory: rapid intensification to 130 kt before the Louisiana landfall

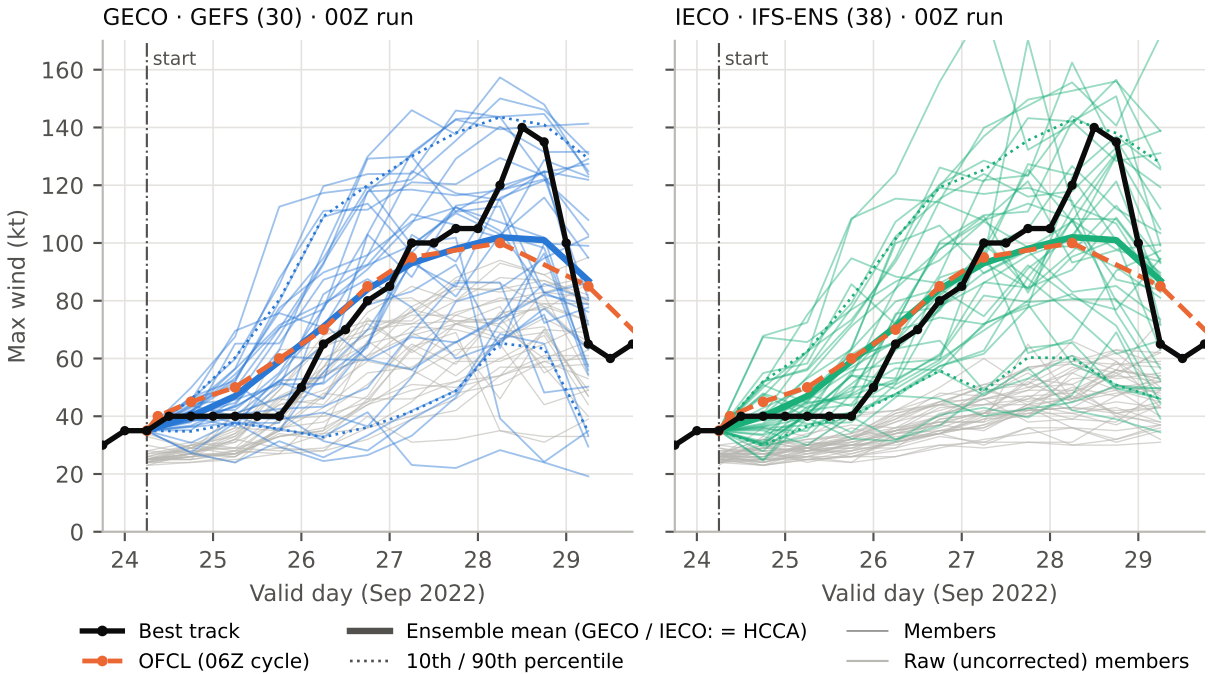

Iota (AL312020), 14 Nov 2020, 06Z cycle / 09Z advisory: rapid intensification to 135 kt (late season)

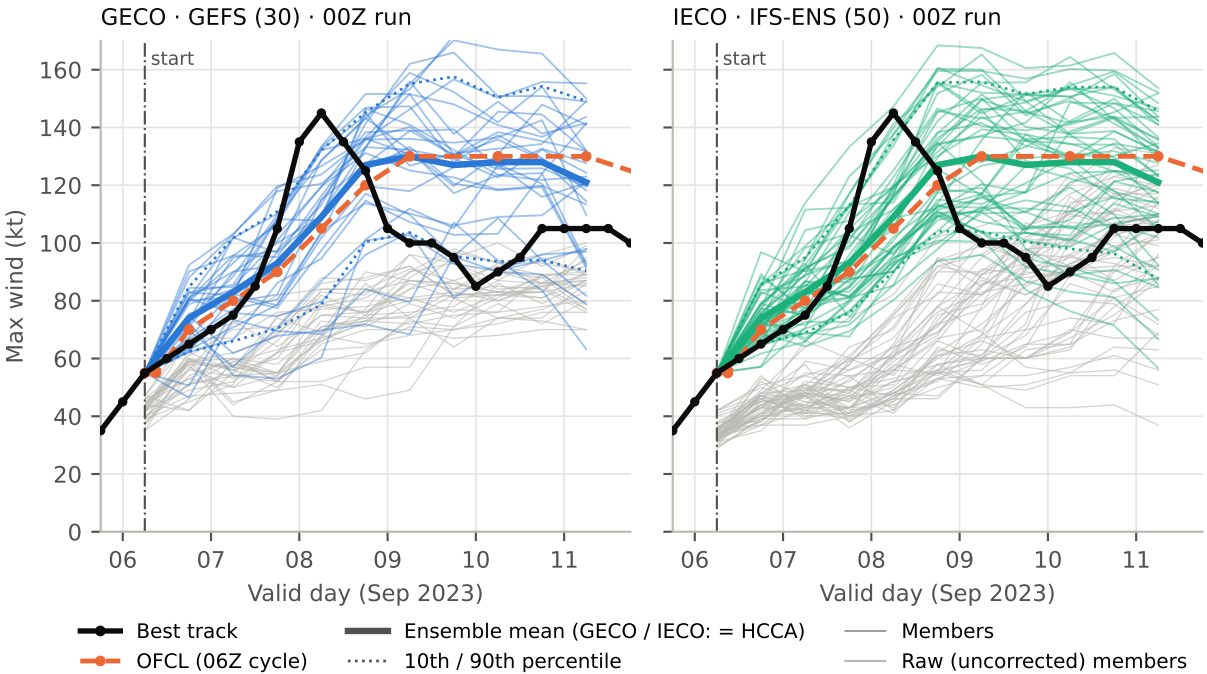

Ida (AL092021), 27 Aug 2021, 06Z cycle / 09Z advisory: rapid intensification to 130 kt before the Louisiana landfall

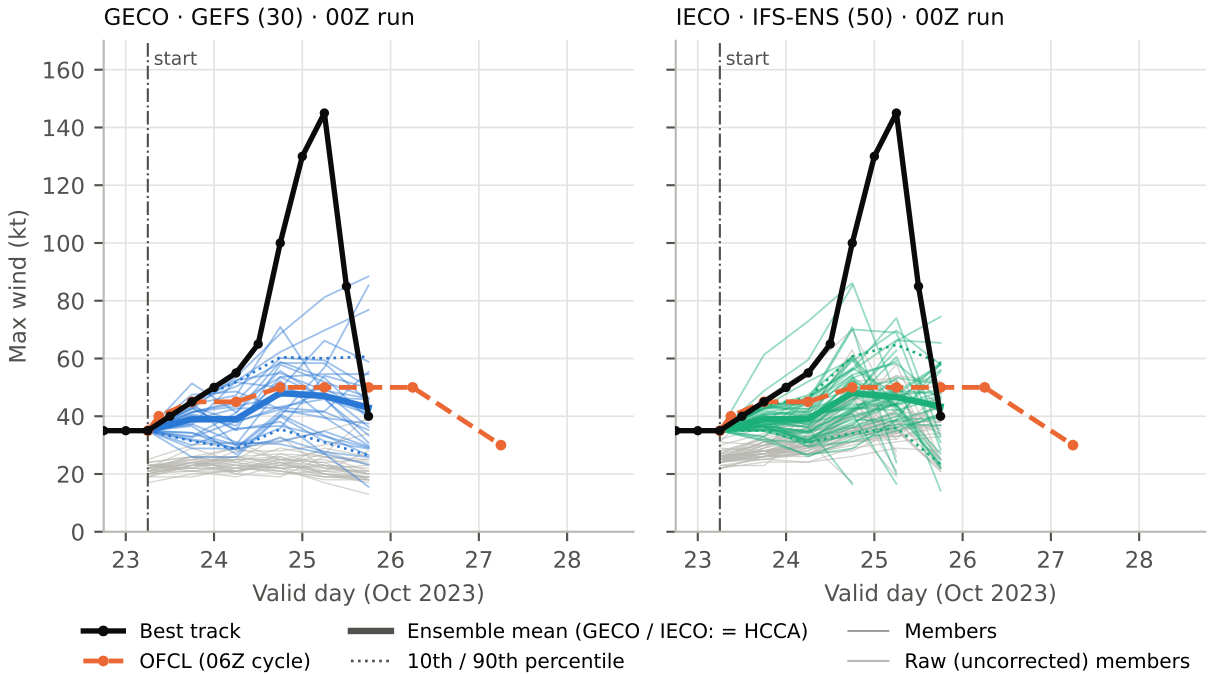

Ian (AL092022), 24 Sep 2022, 06Z cycle / 09Z advisory: intensification to 140 kt before the Florida landfall

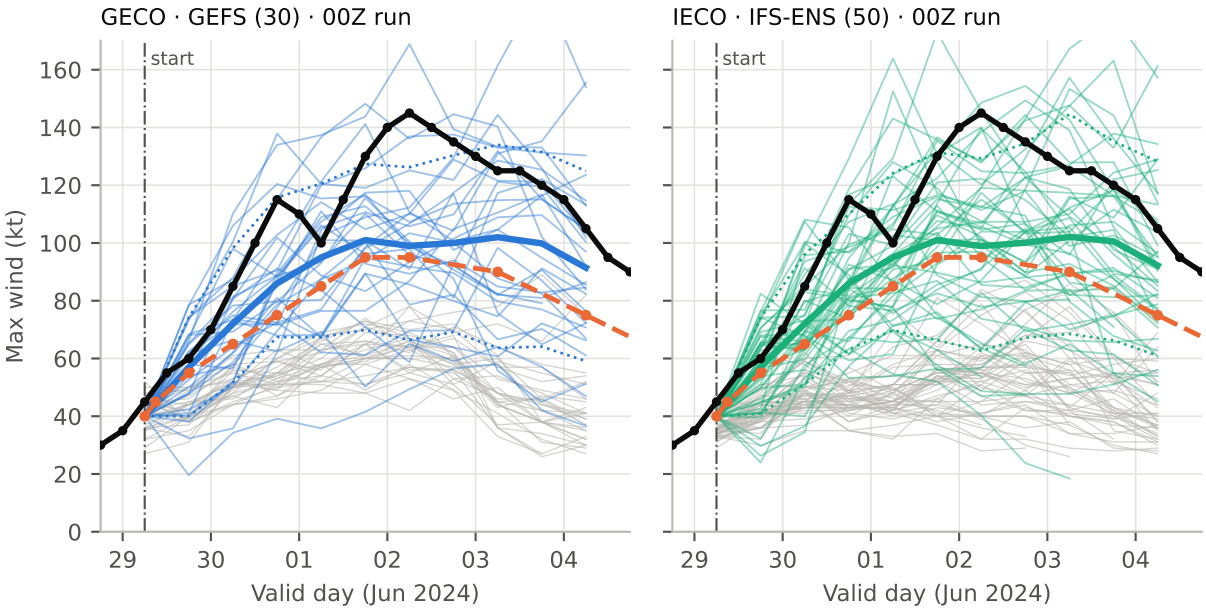

Lee (AL132023), 06 Sep 2023, 06Z cycle / 09Z advisory: extreme rapid intensification (+70 kt in 24 h) to 145 kt

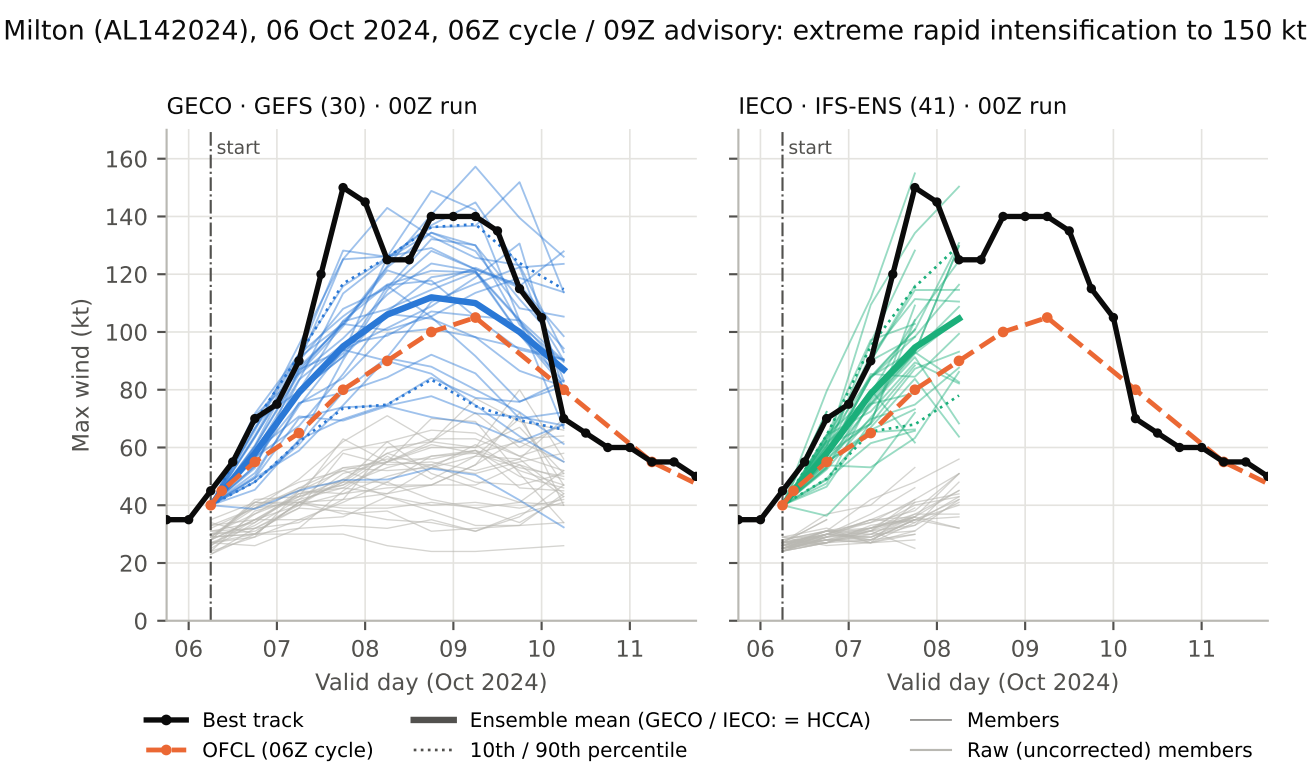

Otis (EP182023), 23 Oct 2023, 06Z cycle / 09Z advisory: extreme rapid intensification (+90 kt in 24 h) to 145 kt at Acapulco

Beryl (AL022024), 29 Jun 2024, 06Z cycle / 09Z advisory: earliest Category 5 on record

Milton (AL142024), 06 Oct 2024, 06Z cycle / 09Z advisory: extreme rapid intensification to 150 kt
